- N. Accept letter of resignation from Public Works employee, Donta Perry, effective September 12, 2024 and authorize the HR Director to follow normal recruitment procedures.
- O. Approve request to designate the Trotter Convention Center as an alternative location for the Reopening of the Bridge Ceremony if it rains. The event is scheduled to be held on Sunday, October 6, 2024 at 2:00 p.m.
- P. Approve request for the Chief Financial Officer, Jim Brigham, to attend CPA training on October 22 & 23, 2024 at no cost to the City.
- Q. Approve permit for Grand Opening of Catfish Alley Studio Ribbon Cutting Ceremony, to be held October 3, 2024 at 4:00 p.m.

Council Member Jones made a motion to approve the Consent Agenda as amended. Council Member Beard seconded the motion. The Mayor called for discussion, and there being none, all Council Members voted in favor of same, with a unanimous vote.

V. APPROVE DOCKET OF CLAIMS:

Councilwoman Stewart made a motion to approve the Docket of Claims for October 1, 2024, in the amount of \$937,056.48. Council Member Greene seconded the motion. Councilwoman DiCicco directed questions about vouchers on the docket to the Park Director, who came forward and offered an explanation.

All Council Members present voted in favor of the motion, except Council Member Jones and Councilwoman DiCicco, who opposed.

The motion carried 4/2.

VI. REPORTS, PROCLAMATIONS, RECOGNITIONS AGENDA:

- A.** Mayor Gaskin asked members of the Council if they had any announcements. There were none.

Mayor Gaskin then made the following announcement about upcoming events:

- I want to remind the public to come out to National Night Out on Crime that will begin tonight at 6:00 p.m. in front of the Municipal Complex.
- The 7th Avenue Heritage Festival will be held on October 4 & 5, 2024.
- Little Hands/Big Trucks will be held Saturday, October 5, 2024 at the Farmer's Market.
- Oktober Fest will be held at Munson Brother on October 5, 2024.
- Children's Health Resource Fair will be held on October 5, 2024 at the Farmers' Market/Boy Scout Hut from 10:00 a.m. – 12:00 noon. There will be free resources and information for parents, educators, caregivers and Community partners.
- The Pedestrian Bridge reopening will be held on Sunday, October 6, 2024, beginning at 2:00 p.m. The program and ribbon-cutting ceremony will begin at 2:30. Following the program, the public can listen to a band, Delta Rising, who will be performing on the Riverwalk stage. This event will be moved to the Trotter Convention Center if it rains.

B. Board Vacancies

Mayor Gaskin announced vacancies on various boards, as follows:

REDEVELOPMENT AUTHORITY BOARD

1 Vacancy, 5-Year Term, Dennis Erby's Term expires October 15, 2024. Appointment will be made October 15, 2024.

APPLICANT:

Dennis Erby

COLUMBUS-LOWNDES LIBRARY BOARD

1 Vacancy, 5-Year Term, Hillary Richardson's Term expires October 1, 2024.

Appointment will be made October 1, 2024.

APPLICANTS:

Anita Pintado

Elizabeth (Libby) Robertson

Council Member Jones made a motion to appoint Anita Pintado to the Columbus-Lowndes Library Board for a 5-Year Term, until October 1, 2029. Councilwoman DiCicco seconded the motion.

All Council Members voted in favor of the motion.

The motion carried 6/0.

GOLDEN TRIANGLE LINK DEVELOPMENT BOARD

1 Vacancy, 3-Year Term, Bill West's Term expires September 30, 2024.

Appointment will be made October 1, 2024.

APPLICANT:

Bill West

Councilwoman DiCicco made a motion to reappoint Bill West to the Golden Triangle LINK Development Board for a 3-Year Term, until September 30, 2027. Council Member Beard seconded the motion.

All Council Members voted in favor of the motion.

The motion carried 6/0.

VII. CITIZENS INPUT AGENDA:

Attorney Chynnee Bailey, Columbus Middle School Parent Teacher Organization, with request of financial support.

Attorney Chynnee Bailey came before the Mayor and Council and requested financial support in the amount of \$10,000 for a Parade that will be held honoring the Middle School for achieving a "B" rating. The funds would be used for floats and decoration. Attorney Bailey was asked if she had a budget and she answered "No" and remarked that she is accepting donations to the cause. Council Member Beard made a motion to give Ms. Bailey and Columbus Middle

School the sum of \$5,000 for this cause. Councilwoman Stewart seconded the motion. The funds will be taken from the 2% Restaurant Beverage Tax fund as a Special Event.

All Council Members voted in favor of the motion, except Council Member Greene, who opposed.

The motion carried 5/1.

Mayor Gaskin remarked that the City is very proud to see the “B” rating for most schools and the “A” rating for Fairview Elementary School.

Pastor Johnny Durrah & Julia Burgin – Watershed/Drainage

Pastor Durrah and Ms. Burgin did not show up.

VIII. POLICY AGENDA:

A. ITEM “A” WAS DISCUSSED ABOVE IN EXECUTIVE SESSION.

B. Discuss/Approve request pertaining to Leadership Plaza – request permission to remove the existing faucets and replace them with a freeze-proof faucet and request permission to remove the gas poles at no cost to the City.

Council Member Beard made a motion to approve the request pertaining to Leadership Plaza – request permission to remove the existing faucets and replace them with a freeze-proof faucet and request permission to remove the gas poles at no cost to the City. Councilwoman DiCicco seconded the motion.

All Council Members voted in favor of the motion.

The motion carried 6/0.

C. Discuss/Approve Derelict Property Docket

RONALD/TWANA COCKRELL

126 Gaylane Drive

CASE NUMBER: 24-0265

Dilapidated Structure

The General Counsel called cause number **24-0265**. Code Enforcement Officer Sasha James stated that the owner of this property has made substantial improvement to the conditions and recommended giving the property owner a **45-day extension** to remediate the property. The property

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

is in such a state of uncleanliness as to be a menace to the public under Section 21-19-11 of the Mississippi Code. Council Member Greene made a motion to give the property owner a **45-day extension** to remediate the property. Ms. James also recommends that an Order be issued for the property in accordance with Section 21-19-11 of the Mississippi Code, stating the City may remove dilapidated buildings or dilapidated fences up to six (6) more times in the twelve (12) month period immediately following the Order and cutting grass and weeds and remove rubbish, personal property and other debris no more than twelve (12) times in a twenty-four (24) month period. Councilwoman Stewart seconded the motion.

All Council Members voted in favor of the motion.

The motion carried 6/0.

JOHN N. BOTES

707 Cornelia Street

CASE NUMBER: 24-0274

Overgrown Lot

The General Counsel called cause number **24-0274**. Code Enforcement Officer Sasha James stated that the owner of this property has made substantial improvement to the conditions and recommended giving the property owner a **15-day extension** to remediate the property. The property is in such a state of uncleanliness as to be a menace to the public under Section 21-19-11 of the Mississippi Code. Council Member Greene made a motion to give the property owner a **15-day extension** to remediate the property. Ms. James also recommends that an Order be issued for the property in accordance with Section 21-19-11 of the Mississippi Code, stating the City may remove dilapidated buildings or dilapidated fences up to six (6) more times in the twelve (12) month period immediately following the Order and cutting grass and weeds and remove rubbish, personal property and other debris no more than twelve (12) times in a twenty-four (24) month period. Councilwoman DiCicco seconded the motion.

All Council Members voted in favor of the motion.

The motion carried 6/0.

SAMMY L. ROLAND

402 19th Street South

CASE NUMBER: 24-0264

Dilapidated Structure

RE: 142 PANDORA DR
APN: 62W17-01-04600
Case No: CE-24-0273
Officer: Sasha James - Ward: 1

PLEASE TAKE NOTICE that the Mayor and City Council of the City of Columbus (the "Governing Authority"), having a population over one thousand five hundred (1500), has authorized the City of Columbus Code Enforcement Director and/or her assistant to determine whether the property or parcel of land is in such a state of uncleanness as to be a menace to the public health, safety and welfare of the community when the fee or cost to clean property or a parcel of land that is one (1) acre or less does not exceed Two Hundred Fifty Dollars (\$250.00), excluding administrative costs.

The particular condition(s) as determined by the authorized municipal employee existing as of the date of this notice is/are one or more of the following:

- ☐ The presence of overgrowth of weeds, grass or other vegetation
- ☐ The presence of rubbish/garbage and other debris
- ☐ The presence of abandoned building
- ☐ The presence of abandoned or dilapidated fence(s)
- ☐ The presence of burned structure
- ☐ The presence of dilapidated building(s), slabs or personal property
- ☐ The presence of property maintenance code violation
- ☐ The presence of standing water in cesspools
- ☐ The presence of cistern(s), standing water and cesspools

You are hereby advised that by this correspondence a determination has been made that the condition of the property or parcel of land as described is a menace to the public health, safety and welfare of the community, and as such the governing authority of the City of Columbia, if the owner does not do so himself, on or before the 15th day of September, 2024, shall proceed to clean the land, by the use of its employees, or by contract, by cutting grass and weeds, filling cisterns, removing rubbish, and repairing or dilapidated fences, outside toilets, abandoned or dilapidated buildings, slabs, personal property, and debris, and that any property, building, structure, or other improvement on the property, or any portion thereof, which removal of personal property shall not be subject to the provisions of Section 21-39-21, and other debris, and draining cesspools and standing water therefrom.

Code Section:	Corrective Action:	Compliance Date:
307.1 - Accumulation of Rubbish and Garbage	Remove all trash and debris from the property. All equipment, appliance, and/or material must be stored away from public view and/or stored in an enclosed structure. Generally, any equipment, materials or furnishings that would ordinarily not be used outdoors may not be stored outdoors.	September 16, 2024

Thereafter, the governing authority shall by resolution adjudicate the actual cost of cleaning the property under this provision, provided the same does not exceed Two Hundred Fifty Dollars (\$250.00) and may also impose a penalty not to exceed One Hundred Dollars (\$100.00) or one hundred percent (100%) of the actual cost of cleaning the property, whichever is more.

[illegible]

An appeal of this decision may be made to the Governing Authority of the City of Columbus and such appeal shall be in writing, state the basis for the appeal and be filed with the city clerk no later than seven (7) days from the latest date of notice required under MCA 21-19-11(2).

For any questions, please call Sasha James, the Code Enforcement Director for the City of Columbus at 662-245-5063 or 662-245-5070.

This the 9th day of September, 2024.
Sasha James,
City of Columbus Director of Code Enforcement

A copy of this notice shall be recorded in the minutes of the governing authority in conjunction with MCA Section 21-19-11 (2).

At least seven (7) days before the date of cleaning, this notice is required to be posted on the property or parcel of land identified herein AND at city hall or such other place in the municipality where such notices are posted AND is required to be mailed, via United States Mail, postage prepaid, to the address of the property or parcel of land identified herein except where the land or structure(s) is apparently vacant, AND to the address where the ad valorem tax notice for the property or parcel of land identified herein is sent by the office charged with collecting ad valorem taxes for the subject property or parcel of land identified herein.

This Notice was posted on the subject property on: September 9, 2024

By: Sasha James, City of Columbus Director of Code Enforcement

This Notice was posted at the City Building Inspection Office on: September 9, 2024

By: Sasha James, City of Columbus Director of Code Enforcement

This Notice was mailed via United States Mail, postage prepaid, to each address identified above on September 9, 2024.

- ☐ The presence of standing water in cesspools
- ☐ The presence of cistern(s), standing water and cesspools

You are hereby advised that by this correspondence a determination has been made that the condition of property or parcel of land as described is a menace to the public health, safety and welfare of the community, and as such the governing authority of the City of Columbus, if the owner does not do so himself, on or before the 18th day of September, 2024, shall proceed to clean the land, by the use of municipal employees or by contract, by cutting grass and weeds, filling, exterms, removing rubbish, abandoned or dilapidated fences, outside toilets, abandoned or dilapidated buildings, slabs, personal property, which removal of personal property shall not be subject to the provisions of Section 21-39-21, and other debris, and draining cesspools and standing water therefrom.

Code Section:	Corrective Action:	Compliance Date:
107.1 - Accumulation of Rubbish and Garbage	Remove all trash and debris from the property. All equipment, appliance, and/or material must be stored away from public view and/or stored in an enclosed structure. Generally, any equipment, materials or furnishings that would ordinarily not be used outdoors may not be stored outdoors.	September 18, 2024

YOU ARE ADVISED THAT A FINDING BY THE MUNICIPAL OFFICIAL THAT THE PROPERTY OR PARCEL OF LAND IS IN NEED OF CLEANING WILL AUTHORIZE THE MUNICIPALITY TO REENTER THE PROPERTY OR PARCEL OF LAND FOR A PERIOD OF TWO (2) YEARS AFTER THE MUNICIPAL OFFICIAL'S DETERMINATION WITHOUT ANY FURTHER HEARING OR ACTION IF NOTICE IS POSTED ON THE PROPERTY OR PARCEL OF LAND AND AT CITY HALL OR ANOTHER PLACE IN THE MUNICIPALITY WHERE SUCH NOTICES ARE GENERALLY POSTED AT LEAST SEVEN (7) DAYS BEFORE THE PROPERTY OR PARCEL OF LAND IS REENTERED FOR CLEANING. A COPY OF THE REQUIRED NOTICE MAILED AND POSTED AS REQUIRED BY MCA SECTION 21-19-11(2) (a)(b)(b) SHALL BE RECORDED IN THE MINUTES OF THE GOVERNING AUTHORITY IN CONJUNCTION WITH THE HEARING REQUIRED BY SAID SECTION.

Thereafter, the governing authority shall by resolution adjudicate the actual cost of cleaning the property under this provision, provided the same does not exceed Two Hundred Fifty Dollars (\$250.00) and may also impose a penalty not to exceed One Hundred Dollars (\$100.00) or one hundred percent (100%) of the actual cost of cleaning the property, whichever is more.

The cost and any penalty imposed may become a civil debt against the property owner, and/or, at the option of the governing authority, an assessment against the property. The "cost assessed against the property" means either the cost to the municipality of using its own employees to do the work or the cost to the municipality of any contract executed by the municipality to have the work done, and additionally may include administrative costs of the municipality not to exceed Fifty Dollars (\$50.00). For subsequent cleaning within the one-year period, upon seven (7) days' notice posted both on the property or parcel of land adjudicated in need of cleaning and at city hall or another place in the municipality where such notices are posted, and consistent with the municipal official's determination as authorized, a municipality may reenter the property or parcel of land to maintain cleanliness without further notice or hearing no more than six (6) times in any twelve-month period with respect to removing abandoned or dilapidated buildings, slabs, dilapidated fences and outside toilets, and no more than twelve (12) times in any twenty-four-month period with respect to cutting grass and weeds and removing rubbish, personal property and other debris on the land, and the expenses of cleaning of the property shall not exceed an aggregate amount of One Thousand Dollars (\$1,000.00) per year. The governing authority may assess the same actual costs, administrative costs, and the expenses of cleaning of the property or land is cleaned as otherwise provided. The penalty provided herein shall not be assessed against the State of Mississippi upon request for reimbursement under Section 29-1-145, nor shall a municipality clean a parcel owned by the State of Mississippi without first giving notice. Upon written authority from the Secretary of State's office, for state-owned properties, a municipality may forgo the notification process that is prescribed in this subsection and proceed to clean the properties and assess costs as prescribed in this subsection, except that, penalties shall not be assessed against the State of Mississippi. A determination made by an appropriate municipal employee under this subsection (2) that the state or condition of property or a parcel of land is a menace to the public health, safety and welfare of the community shall not subsequently be used to replace a hearing if Section 21-19-11(1) is later utilized by a municipality when the prerequisites of Section 21-19-11(2) are not satisfied.

An appeal of this decision may be made to the Governing Authority of the City of Columbus and such appeal shall be in writing, state the basis for the appeal and be filed with the city clerk no later than seven (7) days from the latest date of notice required under MCA 21-19-11(2).

For any questions, please call Sasha James, the Code Enforcement Director for the City of Columbus at 662-245-5063 or 662-245-5070.

This the 11th day of September, 2024,
Sasha James,
City of Columbus Director of Code Enforcement

A copy of this notice shall be recorded in the minutes of the governing authority in conjunction with MCA Section 21-19-11 (2).

At least seven (7) days before the date of cleaning, this notice is required to be posted on the property or parcel of land identified herein AND at city hall or such other place in the municipality where such notices are posted AND is required to be mailed, via United States Mail, postage prepaid, to the address of the property or parcel of land identified herein except where the land or structure(s) is/are apparently vacant, AND to the address where the ad valorem tax notice for the property or parcel of land identified herein is sent by the office charged with collecting ad valorem taxes for the subject property or parcel of land identified herein.

This Notice was posted on the subject property on: September 11, 2024

By: Sasha James, City of Columbus Director of Code Enforcement

This Notice was posted at the City Building Inspection Office on: September 11, 2024

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

NUISANCE PROPERTY NOTICE TO OWNER - PURSUANT TO
SECTION 21-19-1(2) OF THE MISSISSIPPI CODE (Effective 7/1/2022)

JOHNSTON RICHARD F SR/MAGGIE P
115 14 ST N
COLUMBUS, MS 39701

RE: 115 14TH ST N
APN: 61W10-01-06000
Case No: CE-24-0281
Officer: Sasha James - Ward: 5

Date: September 16, 2024

PLEASE TAKE NOTICE that the Mayor and City Council of the City of Columbus (the "Governing Authority"), having a population over one thousand five hundred (1500), has authorized the City of Columbus Code Enforcement Director and/or her assistant to determine whether the property or parcel of land is in such a state of uncleanliness as to be a menace to the public health, safety and welfare of the community when the fee or cost to clean property or a parcel of land that is one (1) acre or less does not exceed Two Hundred Fifty Dollars (\$250.00), excluding administrative costs.

The particular condition(s) as determined by the authorized municipal employee existing as of the date of this notice is/are one or more of the following:

- (X) The presence of overgrowth of weeds, grass or other vegetation
The presence of rubbish/garbage and other debris
The presence of abandoned building
The presence of abandoned or dilapidated fence(s)
The presence of burned structure
The presence of dilapidated building(s), slabs or personal property
The presence of property maintenance code violation
The presence of standing water in cesspools
The presence of cistern(s), standing water and cesspools

You are hereby advised that by this correspondence a determination has been made that the condition of property or parcel of land as described is a menace to the public health, safety and welfare of the community, and as such the governing authority of the City of Columbus, if the owner does not do so himself, on or before the 23rd day of September, 2024, shall proceed to clean the land, by the use of municipal employees or by contract, by cutting grass and weeds, filling cisterns, removing rubbish, abandoned or dilapidated fences, outside toilets, abandoned or dilapidated buildings, slabs, personal property, which removal of personal property shall not be subject to the provisions of Section 21-39-21, and other debris, and draining cesspools and standing water therefrom.

Code Section:	Corrective Action:	Compliance Date:
302.4 - Overgrown Lot	Cut, trim, and maintain overgrown grass, hedges, shrubs, trees, and other vegetation.	September 23, 2024

YOU ARE ADVISED THAT A FINDING BY THE MUNICIPAL OFFICIAL THAT THE PROPERTY OR PARCEL OF LAND IS IN NEED OF CLEANING WILL AUTHORIZE THE MUNICIPALITY TO REENTER THE PROPERTY OR PARCEL OF LAND FOR A PERIOD OF TWO (2) YEARS AFTER THE MUNICIPAL OFFICIAL'S DETERMINATION WITHOUT ANY FURTHER HEARING OR ACTION IF NOTICE IS POSTED ON THE PROPERTY OR PARCEL OF LAND AND AT CITY HALL OR ANOTHER PLACE IN THE MUNICIPALITY WHERE SUCH NOTICES ARE GENERALLY POSTED AT LEAST SEVEN (7) DAYS BEFORE THE PROPERTY OR PARCEL OF LAND IS REENTERED FOR CLEANING. A COPY OF THE REQUIRED NOTICE MAILED AND POSTED AS REQUIRED BY MCA SECTION 21-19-1(2) (MCA) SHALL BE RECORDED IN THE MINUTES OF THE GOVERNING AUTHORITY IN CONJUNCTION WITH THE HEARING REQUIRED BY SAID SECTION.

Thereafter, the governing authority shall by resolution adjudicate the actual cost of cleaning the property under this provision, provided the same does not exceed Two Hundred Fifty Dollars (\$250.00) and may also impose a penalty not to exceed One Hundred Dollars (\$100.00) or one hundred percent (100%) of the actual cost of cleaning the property, whichever is more.

The cost and any penalty imposed may become a civil debt against the property owner, and/or, at the option of the governing authority, an assessment against the property. The "cost assessed against the property" means either the cost to the municipality of using its own employees to do the work or the cost to the municipality of any contract executed by the municipality to have the work done, and additionally may include administrative costs of the municipality not to exceed Fifty Dollars (\$50.00). For subsequent cleaning adjudicated in need of cleaning and at city hall or another place in the municipality where such notices are generally posted, and consistent with the municipal official's determination as authorized, a municipality may within the one-year period, upon seven (7) days' notice posted both on the property or parcel of land adjudicated in need of cleaning and at city hall or another place in the municipality where such notices are generally posted, require the property or parcel of land to maintain cleanliness without further notice or hearing no more than six (6) times in any twelve-month period with respect to removing abandoned or dilapidated buildings, slabs, dilapidated fences and outside toilets, and no more than twelve (12) times in any twenty-four-month period with respect to cutting grass and weeds and removing rubbish, personal property and other debris on the land, and the expense of cleaning of the property shall not exceed an aggregate amount of One Thousand Dollars (\$1,000.00) per year. The governing authority may assess the same actual costs, administrative costs, and not be assessed against the State of Mississippi upon request for reimbursement under Section 29-1-145, nor shall a municipality clean a parcel owned by the State of Mississippi without first giving notice. Upon written notice from the Secretary of State's office, for state-owned properties, a municipality may forgo the notification process that is prescribed in this subsection and proceed to clean the properties and assess costs as prescribed in this subsection, except that, penalties shall not be assessed against the State of Mississippi. A determination made by an appropriate municipal employee under this subsection (2) that the state or condition of property or a parcel of land is a menace to the public health, safety and welfare of the community shall not subsequently be used to replace a hearing if Section 21-19-1(1) is later utilized by a municipality when the prerequisites of Section 21-19-1(2) are not satisfied.

An appeal of this decision may be made to the Governing Authority of the City of Columbus and such appeal shall be in writing, state the basis for the appeal and be filed with the city clerk no later than seven (7) days from the latest date of notice required under MCA 21-19-1(2).

For any questions, please call Sasha James, the Code Enforcement Director for the City of Columbus at 662-245-5063 or 662-245-5070.

This the 16th day of September, 2024.

Sasha James,
City of Columbus Director of Code Enforcement

A copy of this notice shall be recorded in the minutes of the governing authority in conjunction with MCA Section 21-19-1(2).

At least seven (7) days before the date of cleaning, this notice is required to be posted on the property or parcel of land identified herein AND at city hall or such other place in the municipality where such notices are posted AND is required to be mailed, via United States Mail, postage prepaid, to the address of the property or parcel of land identified herein except where the land or structure(s) is apparently vacant AND to the address where the ad valorem tax notice for the property or parcel of land identified herein is sent by the office charged with collecting ad valorem taxes for the subject property or parcel of land identified herein.

ROBINSON JOHN JR DR
1111 5TH AVE N
COLUMBUS, MS 39701

NUISANCE PROPERTY NOTICE TO OWNER - PURSUANT TO
SECTION 21-19-11(2) OF THE MISSISSIPPI CODE (Effective 7/1/2022)

RE: 1111 5TH AVEN
APN: 61W07-03-11400
Case No: CE-24-0284
Officer: Sasha James - Ward: 5

Date: September 18, 2024

PLEASE TAKE NOTICE that the Mayor and City Council of the City of Columbus (the "Governing Authority"), having a population over one thousand five hundred (1500), has authorized the City of Columbus Code Enforcement Director and/or her assistant to determine whether the property or parcel of land is in such a state of uncleanliness as to be a menace to the public health, safety and welfare of the community when the fee or cost to clean property or a parcel of land that is one (1) acre or less does not exceed Two Hundred Fifty Dollars (\$250.00), excluding administrative costs.

The particular condition(s) as determined by the authorized municipal employee existing as of the date of this notice is/are one or more of the following:

- X) The presence of overgrowth of weeds, grass or other vegetation
The presence of rubbish/garbage and other debris
The presence of abandoned building
The presence of abandoned or dilapidated fence(s)
The presence of burned structure
The presence of dilapidated building(s), slabs or personal property
The presence of property maintenance code violation
The presence of standing water in cesspools
The presence of cistern(s), standing water and cesspools

You are hereby advised that by this correspondence a determination has been made that the condition of property or parcel of land as described is a nuisance to the public health, safety and welfare of the community, and as such the governing authority of the City of Columbus, if the owner does not do so on or before the 25th day of September, 2024, shall proceed to clean the land, by the use of municipal employees or by contract, by cutting grass and weeds, filling cisterns, removing rubbish, abandoned or dilapidated fences, outside toilets, abandoned or dilapidated buildings, slabs, personal property, which removal of personal property shall not be subject to the provisions of Section 21-39-21, and other debris; and draining cesspools and standing water therefrom.

Code Section:	Corrective Action:	Compliance Date:
302.4 - Overgrown Lot	Cut, trim, and maintain overgrown grass, hedges, shrubs, trees, and other vegetation.	September 25, 2021

YOU ARE ADVISED THAT A FINDING BY THE MUNICIPAL OFFICIAL THAT THE PROPERTY OR PARCEL OF LAND IS IN NEED OF CLEANING WILL AUTHORIZE THE MUNICIPALITY TO REENTER THE PROPERTY OR PARCEL OF LAND FOR A PERIOD OF TWO (2) MONTHS TO DETERMINE THE NECESSITY OF FURTHER DETERMINATION WITHOUT ANY FURTHER HEARING OR ACTION IF NOTICE IS POSTED ON THE PROPERTY OR PARCEL OF LAND AND AT CITY HALL OR ANOTHER PLACE IN THE CITY OF MISSISSAUGA, ON OR BEFORE THE HEARING DATE, AND THAT THE PROPERTY OR PARCEL OF LAND IS REENTERED FOR CLEANING. A COPY OF THE REQUIRED NOTICE MAILED BY POST AS REQUIRED BY M.C. SECTION 473(1) SHALL BE POSTED ON THE PROPERTY OR PARCEL OF LAND AND AT CITY HALL OR ANOTHER PLACE IN THE CITY OF MISSISSAUGA AS REQUIRED BY M.C. SECTION 473(1) IN CONJUNCTION WITH THE HEARING AND THE HEARING SHALL BE HELD AS REQUIRED BY M.C. SECTION 473(1).

Thereafter, the governing authority shall by resolution adjudicate the actual cost of cleaning the property under this provision, provided the same does not exceed Two Hundred Fifty Dollars (\$250.00) and may also impose a penalty not to exceed One Hundred Dollars (\$100.00) or one hundred percent (100%) of the actual cost of cleaning the property, whichever is more.

[illegible]

An appeal of this decision may be made to the Governing Authority of the City of Columbus and such appeal shall be in writing, state the basis for the appeal and be filed with the city clerk no later than seven (7) days from the latest date of notice required under MCA 21-19-11(2).

For any questions, please call Sasha James, the Code Enforcement Director for the City of Columbus at 662-245-5063 or 662-245-5070.

This the 18th day of September, 2024.
Sasha James,
City of Columbus Director of Code Enforcement

A copy of this notice shall be recorded in the minutes of the governing authority in conjunction with MCA Section 21-19-11 (2).

At least seven (7) days before the date of cleaning, this notice is required to be posted on the property or parcel of land identified herein AND at city hall or such other place in the municipality where such notices are posted AND is required to be mailed, via United States Mail, postage prepaid, to the address of the property or parcel of land identified herein except where the land or structure(s) is apparently vacant, AND to the address where the ad valorem tax notice for the property or parcel of land identified herein is sent by the office charged with collecting ad valorem taxes for the subject property or parcel of land identified herein.

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

NUISANCE PROPERTY NOTICE TO OWNER - PURSUANT TO
SECTION 21-19-11(2) OF THE MISSISSIPPI CODE (Effective 7/1/2022)

SHARP REBECCA
1309 5TH AVE N
COLUMBUS, MS 39701

RE: 1309 5TH AVE N
APN: 61W07-03-13500
Case No: CE-24-0286
Officer: Sasha James - Ward: 5

Date: September 18, 2024

PLEASE TAKE NOTICE that the Mayor and City Council of the City of Columbus (the "Governing Authority"), having a population over one thousand five hundred (1500), has authorized the City of Columbus Code Enforcement Director and/or her assistant to determine whether the property or parcel of land is in such a state of uncleanness as to be a menace to the public health, safety and welfare of the community when the fee or cost to clean property or a parcel of land that is one (1) acre or less does not exceed Two Hundred Fifty Dollars (\$250.00), excluding administrative costs.

The particular condition(s) as determined by the authorized municipal employee existing as of the date of this notice is/are one or more of the following:

- ☒ The presence of overgrowth of weeds, grass or other vegetation
- ☐ The presence of rubbish/garbage and other debris
- ☐ The presence of abandoned building
- ☐ The presence of abandoned or dilapidated fence(s)
- ☐ The presence of burned structure
- ☐ The presence of dilapidated building(s), slabs or personal property
- ☐ The presence of property maintenance code violation
- ☐ The presence of standing water in cesspools
- ☐ The presence of cistern(s), standing water and cesspools

You are hereby advised that by this correspondence a determination has been made that the condition of property or parcel of land as described is a menace to the public health, safety and welfare of the community, and as such the governing authority of the City of Columbus, if the owner does not do so himself, on or before the 25th day of September, 2024, shall proceed to clean the land, by the use of municipal employees or by contract, by cutting grass and weeds, filling cisterns, removing rubbish, abandoned or dilapidated fences, outside toilets, abandoned or dilapidated buildings, slabs, personal property, which removal of personal property shall not be subject to the provisions of Section 21-39-21, and other debris, and draining cesspools and standing water therefrom.

YOU ARE ADVISED THAT A FINDING BY THE MUNICIPAL OFFICIAL THAT THE PROPERTY OR PARCEL OF LAND IS IN NEED OF CLEANING WILL AUTHORIZE THE MUNICIPALITY TO REENTER THE PROPERTY OR PARCEL OF LAND FOR A PERIOD OF TWO (2) YEARS AFTER THE MUNICIPAL OFFICIAL'S DETERMINATION WITHOUT ANY FURTHER HEARING OR ACTION IF NOTICE IS POSTED ON THE PROPERTY OR PARCEL OF LAND AND AT CITY HALL OR ANOTHER PLACE IN THE MUNICIPALITY WHERE SUCH NOTICES ARE GENERALLY POSTED AT LEAST SEVEN (7) DAYS BEFORE THE PROPERTY OR PARCEL OF LAND IS REENTERED FOR CLEANING. A COPY OF THE REQUIRED NOTICE MAILED AND POSTED AS REQUIRED BY MCA SECTION 21-19-11(2) (a)&(b) SHALL BE RECORDED IN THE MINUTES OF THE GOVERNING AUTHORITY IN CONJUNCTION WITH THE HEARING REQUIRED BY SAID SECTION.

Thereafter, the governing authority shall by resolution adjudicate the actual cost of cleaning the property under this provision, provided the same does not exceed Two Hundred Fifty Dollars (\$250.00) and may also impose a penalty not to exceed One Hundred Dollars (\$100.00) or one hundred percent (100%) of the actual cost of cleaning the property, whichever is more.

The cost and any penalty imposed may become a civil debt against the property owner, and/or, at the option of the governing authority, an assessment against the property. The "cost assessed against the property" means either the cost to the municipality of using its own employees to do the work or the cost to the municipality of any contract executed by the municipality to have the work done, and additionally may include administrative costs of the municipality not to exceed Fifty Dollars (\$50.00). For subsequent cleaning within the one-year period, upon seven (7) days' notice posted both on the property or parcel of land adjudicated in need of cleaning and at city hall or another place in the municipality where such notices are generally posted, and consistent with the municipal official's determination as authorized, a municipality may reenter the property or parcel of land to maintain cleanliness without further notice or hearing no more than six (6) times in any twelve-month period with respect to removing abandoned or dilapidated buildings, slabs, dilapidated fences and outside toilets, and no more than twelve (12) times in any twenty-four-month period with respect to cutting grass and weeds and removing rubbish, personal property and other debris on the land, and the expense of cleaning of the property shall not exceed an aggregate amount of One Thousand Dollars (\$1,000.00) per year. The governing authority may assess the same actual costs, administrative costs, and penalty for each time the property or land is cleaned as otherwise provided. The penalty provided herein shall not be assessed against the State of Mississippi upon request for reimbursement under Section 29-1-145, nor shall a municipality clean a parcel owned by the State of Mississippi without first giving notice. Upon written authority from the Secretary of State's office, for state-owned properties, a municipality may forgo the notification process that is prescribed in this subsection and proceed to clean the property and assess costs as prescribed in this subsection, except that, penalties shall not be assessed against the State of Mississippi. A determination made by an appropriate municipal employee under this subsection (2) that the state or condition of property or a parcel of land is a menace to the public health, safety and welfare of the community shall not subsequently be used to replace a hearing if Section 21-19-11(1) is later utilized by a municipality when the prerequisites of Section 21-19-11(2) are not satisfied.

An appeal of this decision may be made to the Governing Authority of the City of Columbus and such appeal shall be in writing, state the basis for the appeal and be filed with the city clerk no later than seven (7) days from the latest date of notice required under MCA 21-19-11(2).

For any questions, please call Sasha James, the Code Enforcement Director for the City of Columbus at 662-245-5063 or 662-245-5070.

This the 18th day of September, 2024,
Sasha James,
City of Columbus Director of Code Enforcement

A copy of this notice shall be recorded in the minutes of the governing authority in conjunction with MCA Section 21-19-11 (2).

At least seven (7) days before the date of cleaning, this notice is required to be posted on the property or parcel of land identified herein AND at city hall or such other place in the municipality where such notices are posted AND is required to be mailed, via United States Mail, postage prepaid, to the address of the property or parcel of land identified herein except where the land or structure(s) is apparently vacant, AND to the address where the ad valorem tax notice for the property or parcel of land identified herein is sent by the office charged with collecting ad valorem taxes for the subject property or parcel of land identified herein.

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

NUISANCE PROPERTY NOTICE TO OWNER - PURSUANT TO
SECTION 21-19-1(2) OF THE MISSISSIPPI CODE (Effective 7/1/2022)

SANDERS DAVID L/MONA P
1103 MAIN ST
COLUMBUS, MS 39701-4753

RE: 1309 4TH AVE N
APN: 61W07-04-02900
Case No: CE-24-0292
Officer: Sasha James - Ward: 5

Date: September 18, 2024

PLEASE TAKE NOTICE that the Mayor and City Council of the City of Columbus (the "Governing Authority"), having a population over one thousand five hundred (1500), has authorized the City of Columbus Code Enforcement Director and/or her assistant to determine whether the property or parcel of land is in such a state of uncleanness as to be a menace to the public health, safety and welfare of the community when the fee or cost to clean property or a parcel of land that is one (1) acre or less does not exceed Two Hundred Fifty Dollars (\$250.00), excluding administrative costs.

The particular condition(s) as determined by the authorized municipal employee existing at the date of this notice is/are one or more of the following:

- (X) The presence of overgrowth of weeds, grass or other vegetation
- The presence of rubbish/garbage and other debris
- The presence of abandoned building
- The presence of abandoned or dilapidated fence(s)
- The presence of burned structure
- The presence of dilapidated building(s), slabs or personal property
- The presence of property maintenance code violation
- The presence of standing water in cesspools
- The presence of cistern(s), standing water and cesspools

You are hereby advised that by this correspondence a determination has been made that the condition of property or parcel of land as described is a menace to the public health, safety and welfare of the community, and as such the governing authority of the City of Columbus, if the owner does not do so himself, on or before the 25th day of September, 2024, shall proceed to clean the land, by the use of municipal employees or by contract, by cutting grass and weeds, filling cisterns, removing rubbish, abandoned or dilapidated fences, outside toilets, abandoned or dilapidated buildings, slabs, personal property, which removal of personal property shall not be subject to the provisions of Section 21-39-21, and other debris, and draining cesspools and standing water therefrom.

YOU ARE ADVISED THAT A FINDING BY THE MUNICIPAL OFFICIAL THAT THE PROPERTY OR PARCEL OF LAND IS IN NEED OF CLEANING WILL AUTHORIZE THE MUNICIPALITY TO REENTER THE PROPERTY OR PARCEL OF LAND FOR A PERIOD OF TWO (2) YEARS AFTER THE MUNICIPAL OFFICIAL'S DETERMINATION WITHOUT ANY FURTHER HEARING OR ACTION IF NOTICE IS POSTED ON THE PROPERTY OR PARCEL OF LAND AND AT CITY HALL OR ANOTHER PLACE IN THE MUNICIPALITY WHERE SUCH NOTICES ARE GENERALLY POSTED AT LEAST SEVEN (7) DAYS BEFORE THE PROPERTY OR PARCEL OF LAND IS REENTERED FOR CLEANING. A COPY OF THE REQUIRED NOTICE MAILED AND POSTED AS REQUIRED BY MCA SECTION 21-19-1(2) (a)&(b) SHALL BE RECORDED IN THE MINUTES OF THE GOVERNING AUTHORITY IN CONJUNCTION WITH THE HEARING REQUIRED BY SAID SECTION.

Thereafter, the governing authority shall by resolution adjudicate the actual cost of cleaning the property under this provision, provided the same does not exceed Two Hundred Fifty Dollars (\$250.00) and may also impose a penalty not to exceed One Hundred Dollars (\$100.00) or one hundred percent (100%) of the actual cost of cleaning the property, whichever is more.

The cost and any penalty imposed may become a civil debt against the property owner, and/or, at the option of the governing authority, an assessment against the property. The "cost assessed against the property" means either the cost to the municipality of using its own employees to do the work or the cost to the municipality of any contract executed by the municipality to have the work done, and additionally may include administrative costs of the municipality not to exceed Fifty Dollars (\$50.00). For subsequent cleaning within the one-year period, upon seven (7) days' notice posted both on the property or parcel of land adjudicated in need of cleaning and at city hall or another place in the municipality where such notices are generally posted, and consistent with the municipal official's determination as authorized, a municipality may reenter the property or parcel of land to maintain cleanliness without further notice or hearing no more than six (6) times in any twelve-month period with respect to removing abandoned or dilapidated buildings, slabs, dilapidated fences and outside toilets, and no more than twelve (12) times in any twenty-four-month period with respect to cutting grass and weeds and removing rubbish, personal property and other debris on the land, and the expense of cleaning of the property shall not exceed an aggregate amount of One Thousand Dollars and the expense of cleaning of the property shall not exceed an aggregate amount of One Thousand Dollars and (\$1,000.00) per year. The governing authority may assess the same actual costs, administrative costs, and penalty for each time the property or land is cleaned as otherwise provided. The penalty provided herein shall not be assessed against the State of Mississippi upon request for reimbursement under Section 29-1-145, nor shall a municipality clean a parcel owned by the State of Mississippi without first giving notice. Upon written authority from the Secretary of State's office, for state-owned properties, a municipality may forego the notification process that is prescribed in this subsection and proceed to clean the properties and assess costs as prescribed in this subsection, except that, penalties shall not be assessed against the State of Mississippi. A determination made by an appropriate municipal employee under this subsection (2) that the state or condition of property or a parcel of land is a menace to the public health, safety and welfare of the community shall not subsequently be used to replace a hearing if Section 21-19-1(1) is later utilized by a municipality when the prerequisites of Section 21-19-1(2) are not satisfied.

An appeal of this decision may be made to the Governing Authority of the City of Columbus and such appeal shall be in writing, state the basis for the appeal and be filed with the city clerk no later than seven (7) days from the latest date of notice required under MCA 21-19-1(2).

For any questions, please call Sasha James, the Code Enforcement Director for the City of Columbus at 662-245-5063 or 662-245-5070.

This is the 18th day of September, 2024.
Sasha James,
City of Columbus Director of Code Enforcement

A copy of this notice shall be recorded in the minutes of the governing authority in conjunction with MCA Section 21-19-1(2).

D. Discuss/Approve 2024 Municipal Compliance Report

Council Member Beard made a motion to approve the 2024 Municipal Compliance Report. Councilwoman Stewart seconded the motion. Mayor Gaskin asked if there were questions or comments regarding this matter. CFO Jim Brigham remarked that there were two (2) areas where the City was not in compliance: annual inventory of its assets in accordance with guidelines by the Office of the State Auditor and Lettering on some City vehicles are not in compliance. The State's guidelines have been sent to all Department Heads so that all City vehicles with non-compliant lettering can be replaced.

All Council Members voted in favor of the motion.

The motion carried 6/0.

THE MUNICIPAL COMPLIANCE REPORT FOLLOWS:

(THIS SPACE LEFT BLANK INTENTIONALLY)

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

Municipal Compliance Questionnaire

As part of the municipality's audit, the governing authorities of the municipality must make certain assertions with regard to legal compliance. The municipal compliance questionnaire was developed for this purpose.

The following questionnaire and related certification must be completed at the end of the municipality's fiscal year and entered into the official minutes of the governing authorities at their next regular meeting.

The governing authorities should take care to answer these questions accurately. Incorrect answers could reduce the auditor's reliance on the questionnaire responses, resulting in the need to perform additional audit procedures at added cost.

Information

Note: Due to the size of some municipalities, some of the questions may not be applicable. If so, mark N/A in answer blanks. Answers to other questions may require more than "yes" or "no," and, as a result, more information on this questionnaire may be required and/or separate work papers may be needed.

1. Name and address of municipality: CITY OF COLUMBUS
523 MAIN STREET
COLUMBUS, MISSISSIPPI 39701
2. List the date and population of the latest official U.S. Census or most recent official census:
2020 CENSUS 23,853
3. Names, addresses and telephone numbers of officials (include elected officials, chief administrative officer, and attorney).
SEE ATTACHED
4. Period of time covered by this questionnaire:
From: 10/01/2023 To: 09/30/2024
5. Expiration date of current elected officials' term: JULY 1, 2025

MUNICIPAL COMPLIANCE QUESTIONNAIRE
Year Ended September 30, 20__

Answer All Questions: Y - YES, N - NO, N/A - NOT APPLICABLE

PART I - General

1. Have all ordinances been entered into the ordinance book and included in the minutes? (Section 21-13-13)
2. Do all municipal vehicles have public license plates and proper markings? (Sections 25-1-87 and 27-19-27)
3. Are municipal records open to the public? (Section 25-61-5)
4. Are meetings of the board open to the public? (Section 25-41-5)
5. Are notices of special or recess meetings posted? (Section 25-41-13)
5. Are all required personnel covered by appropriate surety bonds?
 - Board or council members (Sec. 21-17-5)
 - Appointed officers and those handling money, see statutes governing the form of government (i.e., Section 21-3-5 for Code Charter)
 - Municipal clerk (Section 21-15-38)
 - Deputy clerk (Section 21-15-23)
 - Chief of police (Section 21-21-1)
 - Deputy police (Section 45-5-9) (if hired under this law)
7. Are minutes of board meetings prepared to properly reflect the actions of the board? (Sections 21-15-17 and 21-15-19)
8. Are minutes of board meetings signed by the mayor or majority of the board within 30 days of the meeting? (Section 21-15-33)
9. Has the municipality complied with the nepotism law in its employment practices? (Section 25-1-53)
10. Did all officers, employees of the municipality, or their relatives avoid any personal interest in any contracts with the municipality during their term or within one year after their terms of office or employment? (Section 25-4-105)
11. Does the municipality contract with a Certified Public Accountant or an auditor approved by the State Auditor for its annual audit within twelve months of the end of each fiscal year? (Section 21-35-31)

Councilwoman DiCicco made a motion to designate Susan Wilder, Grant Writer/Administrator, as the application agent for the FEMA Storm Shelter Grant. Council Member Beard seconded the motion. Ms. Wilder was asked to provide a list of active grants she is currently working on.

All Council Members voted in favor of the motion.

The motion carried 6/0.

I. Discuss/Approve unallocated paving funding

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

Council Member Greene made a motion to allocate \$26,000 from the unallocated paving funding to pave Cooper Road and divide the remaining \$77,000.00 equally among all six (6) wards. Councilwoman Stewart seconded the motion.

All Council Members voted in favor of the motion.

The motion carried 6/0.

J. Discuss/Approve Resolution Approving Property Settlement Statements and authorizing the Mayor to execute same together with other documents necessary to close transaction as it pertains to Leigh Entities.

Council Member Jones made a motion to approve the Resolution approving Property Settlement Statements and Authorizing Columbus Mayor Keith Gaskin to Execute same together with other documents necessary to Close Real Estate Transaction. Council Member Beard seconded the motion and after deliberation, the Mayor called for and recorded the votes to adopt the Resolution as follows:

Ethel Taylor Stewart	voted:	<u>YES</u>
Joseph Mickens, Sr.	voted:	<u>YES</u>
Rusty Greene	voted:	<u>YES</u>
Pierre Beard	voted:	<u>YES</u>
Stephen Jones	voted:	<u>YES</u>
Jacqueline DiCicco	voted:	<u>YES</u>

The Mayor then announced that the above and foregoing Resolution passed upon a unanimous vote of six to zero, 6/0, and thereby announced that the above and foregoing Resolution was : **ADOPTED**, on this the 1st day of October, 2024.

THE RESOLUTION AND SUPPORTING DOCUMENTS FOLLOW:

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

There came on for consideration the matter of the City of Columbus, Mississippi passing the proposed resolution and Council Member Jones offered and moved that the following resolution be adopted by the Mayor and City Council:

**RESOLUTION APPROVING PROPERTY SETTLEMENT
STATEMENTS AND AUTHORIZING COLUMBUS MAYOR
KEITH GASKIN TO EXECUTE SAME TOGETHER WITH OTHER
DOCUMENTS NECESSARY TO CLOSE REAL ESTATE TRANSACTION**

WHEREAS, at a regular meeting of the Mayor and Council of the City of Columbus held on May 7, 2024, the Mayor and Council Approved a Memorandum of Understanding, Resolution and Order approving the purchase, sale and conveyance of certain real property and the engagement of Sheri Lipsey, a Mississippi Real Estate Broker, to negotiate with the Leigh Foundation, Inc. and Leith Enterprises, LLC (together, "Leigh entities") a real estate exchange, the details of which were included in same, a true copy of which is attached as Composite Exhibit 1 to this Resolution together with exhibits attached thereto; and

WHEREAS, City has prepared settlement statements for the exchange with the Leigh entities, which statements have been approved by counsel for the Leigh entities, true and correct copies of which are attached hereto as Composite Exhibit 2 to this Resolution; and

WHEREAS, as soon as the City prepares title commitments for the properties to be exchanged, the transaction will be ready to close, the settlement statements signed together with deeds of conveyance and other transactional documents needed to finalize the same;

NOW THEREFORE, BE IT RESOLVED, that the Mayor and City Council of the City of Columbus, via passage of this resolution, approves the conveyances described in Composite Exhibits 1 and 2 and authorized the Mayor to execute any and all documents needed to finalize the said transaction, including, but not limited to the Settlement Statements and deeds of conveyance;

THE FOREGOING RESOLUTION was seconded by Council Member Beard and after deliberation the Mayor called for and recorded the votes to adopt the Resolution as follows:

MINUTES OF THE

MEMORANDUM OF UNDERSTANDING
RESOLUTION AND ORDER APPROVING THE PURCHASE, SALE AND
CONVEYANCE OF CERTAIN REAL PROPERTY

THIS, Memorandum of Understanding AND Resolution ("MOU") is entered into this the ____ day of _____, 2024, by and among the City of Columbus Mississippi ("Columbus"), a Mississippi Municipality formed under the laws of the State of Mississippi on the one hand and the Leigh Enterprises, LP (LELP) and the Leigh Foundation, Inc. (LFI) on the other hand (collectively known as "the Parties"), with regard to certain real property located near Leigh Drive and Bluecutt Road, within the City of Columbus, Mississippi.

WHEREAS, pursuant to Section 21-17-1(2) of the Mississippi Code, in case any real property belonging to the City shall cease to be used for municipal purposes, the governing authority of the City may sell, convey or lease the same on such terms as the municipality may elect, and the City shall sell such surplus municipal property by advertising for sealed bids unless by resolution duly and lawfully spread on the minutes that the sale of such property in the manner otherwise provided by law is not necessary or desirable for the financial welfare of the City and that the use for which the property is to be sold, conveyed or leased will promote and foster the development and improvement of the community in which it is located and the economic welfare thereof, the Mayor and Council are authorized and empowered, in their discretion, to sell convey or lease such surplus property without having to advertise and accept competitive bids by either having two appraisals (one from the buyer and one from the City) and selling at a price not less than the average of the two appraisals or the City may contract for the professional services of a Mississippi Licensed real estate broker to assist the City in the marketing and sale or lease of the property at a reasonable fee not in excess of what is reasonable and customary within the City and in all such sales, the City shall retain all mineral rights that it owns, together with the right of ingress and egress to remove same; and

WHEREAS, the City is the owner of approximately 1.76 acres of land located on what was formerly a rail-line owned and operated by the Columbus and Greenville Railway and is depicted on Exhibit A attached hereto; and

WHEREAS, LELP owns certain real property bordering the southern right-of-way of Bluecutt Road and has orally offered to convey 0.59 acres as depicted on Exhibit B attached hereto, to the City, contingent upon the City conveying to LFI the City's 1.76 acres depicted on Exhibit A, subject to a cash payment by the City as described hereinbelow; and

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

WHEREAS, LFI owns certain real property bordering the southern right-of-way of Bluecutt Road and has orally offered to convey 0.27 acres as depicted on Exhibit B attached hereto, to the City, contingent upon the City conveying to LFI the City's 1.76 acres depicted on Exhibit A, subject to a cash payment by the City as described hereinbelow; and

WHEREAS, the City needs the real property depicted in Exhibit B to erect traffic control devices and to widen Bluecutt Road for the general welfare and safety of the traveling public, and LELP and LFI desire to secure title to the City's property depicted on Exhibit A to make their property more attractive for commercial development; and

WHEREAS, the City has determined through appraisal that its real property depicted on Exhibit A has a fair market value of approximately \$96,000 and that the real property offered by LELP depicted on Exhibit B has a fair market value of approximately \$77,000 and that the real property offered by LFI has a fair market value of \$35,000; and

NOW, THEREFORE, the Parties enter into this Memorandum of Understanding and the Mayor and Council adopt same as a Resolution to be spread across the minutes of the City as follows

(1) (a) The real property depicted on Exhibit A has ceased to be used and is not needed for municipal purposes and is not used in the operation of the City; (b) the Mayor and Council finds and determines that the sale of the real property depicted on Exhibit A by sealed bid is not necessary or desirable for the financial welfare of the municipality; and (c) that the use of such property for the purposes for which it is to be sold and conveyed will promote and foster the development and improvement of the community and the economic welfare thereof and to approve the engagement of Sheri Lipsey, a licensed Mississippi real estate broker, of Weichert Realtors Innovations, at a commission of \$1,000 to negotiate a real property exchange between the City and LELP and LFI, with the City paying to LELP and/or LFI an amount not exceeding \$16,000 as set forth in Exhibit C attached hereto; and

(2) LELP and LFI agree to the exchange together with the payment by the City of the difference in the fair market value of the property exchanged subject to

MINUTES OF THE
MAYOR AND CITY COUNCIL
OCTOBER 1, 2024

and the City, with the City reserving mineral rights together with the right of ingress and egress to remove same.

Council Member Jones moved that the above and foregoing MOU, Resolution and Order, be adopted by the Mayor and Council and spread across the minutes of the City and that all the factual averments and statements contained within this resolution and Order be found as fact to be true, correct and proper. Council Member Greene seconded the motion and after the motion was thoroughly discussed and considered, the Mayor called for a vote on the motion and the Clerk recorded the votes as follows:

	Voted Yes or No
Council Member Stewart	<u>yes</u>
Council Member Mickens	<u>yes</u>
Council Member Greene	<u>yes</u>
Council Member Beard	<u>yes</u>
Council Member Jones	<u>yes</u>
Council Member DiCicco	<u>yes</u>

The MOU, Resolution and Order having received the majority vote of the Council, the Mayor announced that the Motion carried and that the Resolution and Order was hereby ADOPTED.

WITNESS OUR SIGNATURES, this the 7th day of May, 2024.

HAVING A FOSSIL PARK IN YOUR COMMUNITY CAN OFFER NUMEROUS BENEFITS, RANGING FROM EDUCATIONAL OPPORTUNITIES TO ECONOMIC GROWTH. HERE ARE SOME KEY ADVANTAGES:

1. Educational Opportunities

Hands-On Learning: Fossil parks provide a unique, hands-on learning environment where visitors can discover and study fossils, enhancing their understanding of natural history and paleontology.

School Programs: They can serve as outdoor classrooms for local schools, offering educational programs and field trips that align with science curricula.

2. Tourism and Economic Growth

Attracting Visitors: Fossil parks can attract tourists, boosting local businesses such as hotels, restaurants, and shops.

Job Creation: The development and maintenance of the park can create jobs in the community, from park rangers to educational staff.

3. Community Engagement

Volunteer Opportunities: Fossil parks often rely on volunteers for various activities, fostering community involvement and pride.

Events and Workshops: Hosting events, workshops, and fossil digs can bring the community together and provide engaging activities for all ages.

4. Environmental Awareness

Conservation Education: Fossil parks can educate the public about the importance of preserving natural history and protecting fossil sites.

Sustainable Practices: They can promote sustainable tourism and conservation practices within the community.

5. Recreational Activities

Outdoor Recreation: In addition to fossil hunting, these parks often offer hiking trails, picnic areas, and other recreational facilities, encouraging outdoor activities and healthy lifestyles.

6. Cultural and Historical Significance

Preserving Heritage: Fossil parks help preserve important paleontological sites and artifacts,

contributing to the cultural and historical heritage of the area.

Public Exhibits: They can feature exhibits and displays that highlight the region's geological history, making it accessible and interesting to the public.

FOSSIL PARKS CAN SIGNIFICANTLY BOOST THE LOCAL ECONOMY IN VARIOUS WAYS. HERE ARE SOME KEY BENEFITS:

1. Tourism Revenue

Attracting Visitors: Fossil parks draw tourists, including families, school groups, and researchers, who spend money on local accommodations, dining, and shopping¹.

Special Events: Hosting events such as fossil digs, educational workshops, and guided tours can attract additional visitors and generate revenue.

2. Job Creation

Direct Employment: Fossil parks create jobs for park rangers, educators, maintenance staff, and administrative personnel.

Indirect Employment: Increased tourism supports local businesses, leading to job creation in sectors like hospitality, retail, and transportation.'

3. Educational Opportunities

School Programs: Fossil parks can partner with local schools to offer educational programs, field trips, and internships, enhancing the local education system.

Research Grants: Collaboration with universities and research institutions can bring in grants and funding for scientific research and educational initiatives.

4. Community Engagement

Volunteer Programs: Engaging the community through volunteer opportunities fosters a sense of ownership and pride, encouraging local support and participation.

Local Partnerships: Partnering with local businesses and organizations for events and sponsorships can strengthen community ties and economic resilience.

5. Property Value Increase

Enhanced Appeal: Well-maintained parks and green spaces can increase the attractiveness of the area, leading to higher property values and increased investment in the community.

6. Environmental Benefits

Sustainable Practices: Implementing sustainable landscaping and conservation practices can reduce maintenance costs and promote environmental health, benefiting the local economy in the long term.

FOSSIL PARKS OFFER A MULTIFACETED BOOST TO THE LOCAL ECONOMY BY ATTRACTING TOURISTS, CREATING JOBS, ENHANCING EDUCATIONAL OPPORTUNITIES, AND FOSTERING COMMUNITY ENGAGEMENT. BY LEVERAGING THESE BENEFITS, COMMUNITIES CAN ENSURE THE LONG-TERM SUCCESS AND SUSTAINABILITY OF THEIR FOSSIL PARKS.

Creating a sustainable funding model for a fossil park involves diversifying revenue streams, engaging the community, and leveraging partnerships. Here are some strategies to consider:

1. Diversify Funding Sources

Government Grants: Apply for federal, state, and local grants dedicated to conservation, education, and tourism.

Corporate Sponsorships: Partner with businesses that align with your mission. Offer naming rights or sponsorship opportunities for specific exhibits or programs.

Individual Donations: Develop a robust fundraising campaign targeting individual donors. Offer membership programs with benefits such as exclusive tours or events.

2. Earned Income

Admission Fees: Charge a reasonable entry fee for visitors. Offer annual passes or family packages to encourage repeat visits.

Merchandise Sales: Sell branded merchandise, such as T-shirts, hats, and educational materials, in a gift shop or online store.

Educational Programs: Offer paid workshops, guided tours, and fossil digs. Partner with schools for field trips and educational programs.

3. Community Engagement

Volunteer Programs: Engage the community through volunteer opportunities. Volunteers can assist with maintenance, educational programs, and special events.

Events and Fundraisers: Host events such as fossil fairs, lectures, and fundraising dinners to raise awareness and funds.

4. Partnerships

Academic Institutions: Collaborate with universities and research institutions for joint research projects and educational programs.

Non-Profit Organizations: Partner with conservation and educational non-profits to share resources and expertise.

5. Sustainable Practices

Green Infrastructure: Implement sustainable practices such as solar panels, rainwater harvesting, and native landscaping to reduce operational costs.

Grant Opportunities: Seek grants specifically for sustainability projects to fund these initiatives.

6. Marketing and Outreach

Social Media Campaigns: Use social media to promote the park, share success stories, and engage with the community.

Public Relations: Develop a strong PR strategy to highlight the park's impact on education, conservation, and the local economy.

7. Financial Management

Budgeting: Create a detailed budget that outlines all income and expenses. Regularly review and adjust the budget to ensure financial stability.

Financial Controls: Implement strong financial controls to manage funds effectively and ensure transparency.

By implementing these strategies, you can create a sustainable funding model that supports the long-term success of your fossil park

A fossil park can be a valuable asset to any community, providing educational, economic, and recreational benefits while promoting environmental conservation and community engagement. By fostering a deeper appreciation for natural history, these parks can enrich the lives of residents and visitors alike.

Ask Rufus: The ostrich-like dinosaurs of Columbus

 cdispatch.com/opinions/ask-rufus-the-ostrich-like-dinosaurs-of-columbus/

Rufus Ward

September 16, 2023

Rufus Ward

Two weeks ago, The Dispatch had an editorial promoting a fossil park along the Luxapalila at Propst Park. The article mentioned how the finding of a fossil whale in Alabama had generated national interest. To find national coverage of the discovery of an important fossil, one only needs to look at the banks of the Luxapalila.

In October 2022 articles about the finding of the fossil bones of two new dinosaurs along the Luxapalila in Columbus made print or online editions of leading national popular science publications. The online edition of Smithsonian Magazine reported, "Giant ostrich-like dinosaurs once roamed North America. Rare finds in Mississippi paint a picture of these creatures' lost world. ... Enormous birdlike dinosaurs strutted across Mississippi around 85 million years ago."

Discovery Magazine reported, "the analysis of fossils from an ancient formation of rock in northern Mississippi has now revealed two species of these ostrich-like dinosaurs, one of which is among the largest in the world."

Popular Science reported, "Giant ostrich-like dinosaurs give us a glimpse of ancient North America. ... A new discovery might be providing serious nightmare fuel for those with ornithophobia."

The streams and outcroppings around Columbus, Starkville and West Point contain fossils of plants and creatures from the Pleistocene period of about 8,000 to 35,000 years ago and the Upper Cretaceous of about 66 to 90 million years ago. These fossils have attracted national attention since the 1850s when Dr. William Spillman of Columbus discovered a formation full of shark's teeth at Barton's Bluff in present-day Clay County. In 1955 the late Dr. Jack Kaye discovered a formation on the bank of the Luxapalila in Columbus in which he found sharks' teeth. About 40 years later creek channelization work by the Corps of Engineers in the same area exposed more of the formation.

The new exposures were several beds of hard gray and brown sand along the Luxapalila's banks that contained a wide array of 85-million-year-old fossils, including dinosaurs. According to *The Geology of Mississippi* by Dockery and Thompson, University Press of Mississippi, MDEQ, 2016, "The banks of the creek in Columbus have produced a greater number of dinosaur remains than any other site in the state." George Phillips, paleontologist at the Mississippi Museum of Natural Science and a leading researcher of the new dinosaurs, has collected fossils of several different dinosaurs along the creek. While dinosaur bones are uncommon, shark, sawfish, ray and saber-toothed fish teeth are very common in several places along the creek bank. Other fossils found there include mosasaur, plesiosaur, turtle, and crocodile. The dinosaurs included raptor, tyrannosaur, hadrosaur and ornithomimosaur. The ornithomimosaurs were two types, one large and the other smaller and are the previously unknown dinosaurs. It has only been in the last couple of years that enough of the bones have been found that an identification could be made.

The bone casts from the Mississippi Museum of Natural Science that are in the photograph were provided by George Phillips and described as, "The smaller bone (MMNS VP-6378) is a pedal phalanx – specifically from the 2nd toe – of an ornithomimosaur ('ostrich-mimic' dinosaur). It was collected by Eric Loftis in 1997. The larger element (VP-6183) is the 4th metatarsal – outer weight-supporting foot bone – of a large-bodied ornithomimosaur. It was collected by former Columbus resident Richard Rolke in 2001. They are from a fossil 'bone bed' in Columbus about 85 million years old. Dinosaur bones are extremely rare in the eastern U.S. With the publication of the paper last year – Chinzorig et al., 2022 – Columbus, Mississippi, can now boast that it has the greatest number of individual ornithomimosaur remains (from a single locality) than any other state in eastern North America."

Sites along the creek provide a fascinating window into life here 85 million years ago. Other places have developed fossil parks that both attract visitors and provide a fun educational setting for young and old. There is a popular fossil park at Frankstown about 10 miles north of Tupelo. The idea of such a park has been discussed in Columbus since 2016 but with little headway.

The mayor has suggested that if a fossil park were on the Luxapalila, possibly at Propst Park, and included a canoe and kayak run on the creek, then Columbus would offer a unique blend of cultural and natural history that would be unrivaled in the region. The beauty of the idea is that it would be an inexpensive project with great potential and a fantastic educational opportunity. With a little effort and not a lot of expense, think about what Columbus would then have to offer tourists and residents alike. And what child would not love to have the chance to find a dinosaur bone? While those bones are rare here, sharks' teeth and other fossils are very common in the Luxapalila.

The best exhibit focusing on fossils from Mississippi is at the Mississippi Museum of Natural Science in Jackson. Locally there are fossil exhibits at the Dunn-Seiller Geology Museum at Mississippi State University and at MUW's Plymouth Bluff Center.

Birney Imes: Fossil hunting on the Luxapalila

 cdispatch.com/opinions/birney-imes-fossil-hunting-on-the-luxapalila/

Birney Imes

March 19, 2016

Eighty-five million years ago, sharks swam where Gardner Boulevard is now. Carnivorous raptors roamed nearby beaches. Ten-foot-long crocodiles thrashed about.

Let that sink in for a minute, and then I want to tell you about something Rufus Ward has in mind.

All through that area in east Columbus, especially along the banks of Luxapalila Creek, there is abundant evidence of prehistoric life from the Late Cretaceous Period: sharks' teeth, dinosaur bones, mollusks.

Rufus would like to see a fossil park along the Luxapalila where these fossils are accessible. He thinks it would be a quality of life enhancement, and a good thing to have on your list of community assets at a BRAC hearing.

To that end, Rufus invited his friend George Phillips up from the Mississippi Museum of Natural Sciences in Jackson on Friday. Phillips is the paleontology curator at the museum. He's been interested in fossils and ancient artifacts since he was 12 years old.

Phillips, 49, grew up in Columbus; his dad was the late woodsman, farmer and chef, Ed Phillips.

After lunch at John's United Deli, George, Rufus and I went to the banks of the Lux.

In his 1955 masters thesis at Mississippi State University, Jack Kaye, who would teach geology at the school and at The W, wrote about the existence of shark teeth in this area, Phillips said.

Then in 1996, along comes piano teacher Eric Loftis walking his dog on a service road near the banks of the Lux. In some of the spoil piles created by the creek's channelization, Eric finds dinosaur fossils.

"Eric found what is the richest and most prolific and diverse dinosaur fossil site in Mississippi," Phillips said.

The idea, as Rufus sees it, would be the creation of a state park with state park signage and info kiosks, and the city or county would keep the grass cut. At this point, it's little more than a good idea.

Other states have parks where the public can dig for fossils. The closest such facility to us is the W. M. Browning Cretaceous Fossil Park north of Tupelo near Baldwyn.

After our brief walkabout, Rufus and George retrieved their mud boots and returned to the creek. About two hours later they showed up at The Dispatch muddy, smiling and with a small ziploc of treasures: 20 teeth from three different types of sharks and three pieces of coprolite (petrified crocodile feces).

Our headlines, delivered to your inbox

Select the newsletters you want to receive

- StarkMail - Starkville Area Headlines (weekly on Wednesdays)
- MSU Football Gameday Preview (weekly on Fri.)

Phillips described the sharks: "This one was a crustacean eater," he said, holding a small T-shaped tooth between two fingers. Another group of teeth came from a type of goblin shark (Goblin sharks date back 125 million years and are existent today, though rare.). The third group of shark teeth came from a crow shark, which had teeth that were like serrations on a steak knife. "They were carnivorous," Phillips said. "We find their teeth marks on the bones of sea turtles."

Phillips said he got interested in fossils while he was a kid helping his dad on the farm.

Ed Phillips grew soybeans on Gilmer-Wilburn Road. George and his brother, Joey, were responsible for keeping the planter filled with seeds. Between fillings they would nap on seed bags under a shade tree. Another farm hand, Charles "Soul" James, spent his

downtime rock hunting in ditches.

“He would pick up anything,” Phillips said. “Soul always had a pocketful of treasures he would share with us.”

When Soul started finding fossils during their breaks, George and Joey quit taking naps. They became rock hounds, too.

Soul, who lived in the nearby Hill City community, took the Phillips brothers to a prairie creek to look for Indian artifacts.

George has been trolling ditches, creek banks and chalk outcroppings since. When asked to explain his lifelong interest in prehistoric life, he is quick with an answer.

“It’s the past. The uncertainty of it, the mystique,” he said. “They (prehistoric animals) are almost fictional, but they lived on the earth. They inspire kids to learn about science.”

On the subject of kids learning science, Phillips had more to say:

“In Mississippi kids are introduced to the study of natural science doing three things: hunting/fishing, collecting insects and rock hunting.

“I don’t know a single biologist at the museum who didn’t grow up fishing.”

Birney Imes is the publisher of The Dispatch. Email him at .

George Phillips can be reached by email at . His phone number at the museum is (601) 576-6063.

Birney Imes III is the immediate past publisher of The Dispatch.

Rufus Ward: Luxapalila fossils

 cdispatch.com/opinions/rufus-ward-luxapalila-fossils/

April 24, 2022

Rufus Ward

Rufus Ward

It's springtime and my favorite time of the year. Last week I wrote about the flowers of spring, and this week I will look at something I enjoy seeing even more than flowers: fossils.

The streams and outcroppings around Columbus, Starkville and West Point contain fossils of plants and creatures from the Pleistocene period of about 8,000 to 35,000 years ago and the Upper Cretaceous of about 66 to 90 million years ago.

Pleistocene fossils can be found in the very dark soil found on top of the chalk in Black Prairie creeks. The fossils can be in the dark soil or washed out of it into the creeks. Among the fossils I have found are teeth or bones of a giant ground sloth, American zebra, buffalo, camel, mastodon and mammoth. These fossils suggest that the Black Prairie of 20,000 years ago would have resembled a modern-day savanna in Africa.

The Cretaceous fossils are found in the chalk so common in the prairie and in the grayish hard sand found along the banks of the Tombigbee and Luxapalila. The chalk and sand are remnants of a great inland sea in which the present sites of Jackson and Midnight (in the Delta) were volcanic islands. The most common Cretaceous fossils are marine fossils such as shells, crabs, fish vertebrae, shark teeth and marine reptiles such as mosasaurs and turtles.

There are several beds of hard gray and brown sand along the Luxapalila's banks that contain a wide array of 83 million year old fossils. According to *The Geology of Mississippi* by Dockery and Thompson, University Press of Mississippi, MDEQ, 2016, "The banks of the creek in Columbus have produced a greater number of dinosaur remains than any other site in the state." George Phillips, paleontologist at the Mississippi Museum of Natural History, has collected fossils of several dinosaurs along the creek. Shark, sawfish, ray and saber-toothed fish teeth are very common in several places along the creek bank. Other fossils found there include mosasaur, plesiosaur, turtle, crocodile and two raptor dinosaur teeth.

Sites along the creek provide a fascinating window into life here 83 million years ago. Other places have developed fossil parks that both attract visitors and provide a fun educational setting for young and old. There is a fossil park at Frankstown about 10 miles north of Tupelo. The idea of such a park has been discussed in Columbus since 2016 but with little headway.

Last September I helped Nancy Carpenter and Visit Columbus show our town to a German travel writer who was on a tour of Mississippi. I found his comments about Columbus and what appealed to him as a tourism asset most interesting. It was the walkways, historic vistas and slices of natural history that surround downtown or are

only a short drive away. Our guest from Germany, who writes for newspapers with a circulation of 700,000, was amazed at how many different places for walking and exploring and being immersed in history, nature and architecture were so close by.

He said Columbus provided a wonderful venue to experience impressive historic architecture and natural history all near an attractive downtown with good restaurants.

Two hundred-fifty years ago another visitor from overseas passed through here. In 1771, British surveyor Bernard Romans descended the Tombigbee River and passed Plymouth Bluff. He wrote a lengthy description of the bluff, which he called "a very remarkable bluff." He concluded by saying, "it looks as if made by art, and if placed near any town of note, I do not doubt would be much used as a walk." That night he made camp at the mouth of the Luxapalila.

Plymouth Bluff was a fabulous fossil collecting site but most of its fossil-containing beds are lost due to vegetation that has grown up since the river current no longer cleans its fossil-bearing shelf. However, the MUW Center there does have a museum exhibiting an excellent display of local fossils. That museum could be a nearby resource to complement a fossil park.

The mayor has suggested that if a fossil park were on the Luxapalila, possibly at Propst Park, and included a canoe and kayak run on the creek then Columbus would offer a unique blend of cultural and natural history that would be unrivaled in the region. The beauty of the idea is that it would be an inexpensive project with great potential. What we already have in Columbus really impressed a travel writer from Germany. With a little effort and not a lot of expense, think about what Columbus would then have to offer tourists and residents alike.

Rare finds in Mississippi paint a picture of these creatures' lost world

Deinocheirus walks across a landscape dotted with ponds. Fossils found recently in eastern North America provide evidence that similar dinosaurs lived on our continent. Elena Duvernay / Stocktrek Images

Enormous, birdlike dinosaurs strutted across ancient Mississippi around 85 million years ago. The precise appearance of these saurian behemoths is as yet unknown. Paleontologists have only found a smattering of leg and foot bones from these massive reptiles. Yet that small collection of fossil remains hints at a little-known realm of dinosaurs that roamed the eastern half of North America during the Cretaceous. The haunts of *Tyrannosaurus* and *Styracosaurus* to the west are familiar to experts, but paleontologists are only just beginning to piece together the world of the dinosaurs east of the Mississippi River.

The new fossils were found along Luxapallila Creek in Mississippi. The collection of bones belong to dinosaurs called ornithomimosaurs—“bird mimics” that often resembled ostriches with tails and clawed hands. What makes these bones special, North Carolina Museum of Natural Sciences paleontologist Chinzorig Tsogtbaatar and colleagues propose, is that they represent two as-yet-unknown dinosaur species, one of which attained sizes far larger than any ornithomimosaur found on the continent. The researchers have published their research today in *PLOS One*.

Despite only representing a few parts of the body, the bones from Mississippi still contain some telltale clues about the dinosaurs those remains belonged to. By comparing those bones to other better-known ornithomimosaurs, as well as studying the microscopic structure of the bones to estimate the growth patterns of the dinosaurs, Tsogtbaatar and co-authors were able to calculate size and age estimates for the dinosaurs in the sample.

Rather than just one species, the paleontologists propose, the collection from the banks of Luxapallila Creek represent two different ornithomimosaurs. One of them was similar in size to *Gallimimus*—a dinosaur that has had cameos in the *Jurassic Park* films and could grow to be 20 feet long and weigh nearly half a ton. At least one of the bones from this ornithomimosaur indicates that the dinosaur was about 14 years old when it died, with the age and body size being similar to other large ornithomimosaurs found elsewhere. But the new study also proposes that an even bigger ostrich-like dinosaur roamed ancient Mississippi.

Some of the foot bones found in Mississippi look comparable in size to one of the strangest dinosaurs ever found. *Deinocheirus*, the “terrible hands,” was an ornithomimosaur roughly the size of *Tyrannosaurus* that roamed Cretaceous Mongolia. The duck-beaked dinosaur had immense arms, large claws and a small sail along its back. The larger bones from Mississippi suggest that the creature like *Deinocheirus* would be the largest ornithomimosaur yet found in North America. “It’s a bit of a surprise to learn that *Deinocheirus*-sized ornithomimosaurs were also living in North America back in the Cretaceous,” says University of Calgary paleontologist Darla Zelenitsky, who was not involved in the new study. Why such giants have turned up on the eastern half of the continent, rather than in the fossil-rich rocks of the western side, is one of the new questions paleontologists will dig into.

So far, the bones from Mississippi aren’t complete enough to reliably name new species. Nevertheless, Zelenitsky says, “multiple ornithomimosaur species living side by side is interesting.” In other geological formations in western North America, she notes, multiple species of these dinosaurs have been found from the same rock layers and may indicate that ornithomimosaurs preferred different food sources or other habitat requirements to coexist. Future discoveries will help researchers compare how the dinosaur communities differed across the continent. “Hopefully more fossils will be discovered from the east,” Zelenitsky says.

Such discoveries are hard-won. “It’s hard to put into words just how much more we know about dinosaurs in the western U.S. versus the east,” says Smithsonian National Museum of Natural History paleontologist Matthew Carrano, who was not involved in the new paper. Even though some of the earliest major dinosaur discoveries in North America were made on the East Coast, not far from Philadelphia, paleontologists have

been focused on the fossil-rich outcrops of western North America for more than 150 years. Scientists have an easier time finding dinosaurs in the west as a result of both natural and human factors.

The fossil record for dinosaurs across North America isn't even. Where dinosaurs lived was shaped by a now-vanished ocean. Around 100 million years ago, a warm, shallow sea split North America in two. Known as the Western Interior Seaway, these salty waters divided the continent into a subcontinent known as Laramidia to the west and Appalachia to the east. Wet, lowland habitats along the coasts of these subcontinents generally stood a better chance of preserving dinosaurs than areas that were more inland—until the seaway receded by 66 million years ago. To find dinosaurs, paleontologists working toward the East Coast have to trace the outline of these vanished coasts and hope that vegetation or human construction have not covered up or otherwise obscured the rocks that might contain dinosaurs.

"Most of the rocks are just not very accessible," Carrano notes. Where forests and vegetation don't cover over the right rocks in the east, cities and towns do. Even then, he notes, during the last Ice Age immense glacial sheets extended far south and scoured off many of the rocks that formed during the heyday of the dinosaurs. Even when paleontologists in the east find rocks that could preserve dinosaurs, they often locate them on road cuts, construction projects and stream banks. And yet, now and then, eastern fossil hunters come across these rare dinosaurs. Each one is part of a prehistoric tale that is only just beginning to come into focus, surely full of new species that will hopefully be unveiled as paleontologists continue their search.

David J. Cicimurri, Charles N. Ciampaglio & Katelyn E. Runyon. 2014. Late Cretaceous elasmobranchs from the Eutaw Formation at Luxapalila Creek, Lowndes County, Mississippi. - PalArch's Journal of Vertebrate Palaeontology 11, 2 (2014), 1-36. ISSN 1567-2158. 36 pages + 19 figures.

Keywords: Elasmobranchii, Chondrichthyes, Mississippi, Eutaw Formation, Cretaceous

ABSTRACT

A diverse vertebrate assemblage was recovered from the Eutaw Formation along a stretch of Luxapalila Creek in Lowndes County, Mississippi. The assemblage is dominated by elasmobranchs but also includes osteichthyans (seven species), archosaurs (one crocodilian, two dinosaurs), and turtles (trionychid and chelonoid). Twenty one elasmobranch taxa were identified (14 selachians and seven batoids), including new species *Meristodonoides multiplicatus*, *Lonchidion cristatum*, and *Cantioscyllium grandis*. Our sample also enabled us to expand the known range of variation for some other poorly diagnosed species. The elasmobranch assemblage consists predominantly of species with presumed benthic habits (14), including the orectolobiform sharks and sclerorhynchid rays, whereas the seven lamniform sharks represent pelagic species. We believe that the sharks and rays inhabited a warm-water, nearshore marine environment.

Introduction

Upper Cretaceous strata of the Eutaw Group are exposed in northeastern Mississippi (figure 1) as part of an outcrop belt that extends from west-central Georgia, through central Alabama, and into western Tennessee (see Mancini & Soens, 1994). The Eutaw Group of eastern Mississippi includes the McShan Formation and overlying Eutaw Formation, and the Eutaw Formation is further subdivided into the Eutaw and overlying Tombigbee Sand members (figure 2). The Tombigbee Sand Member was deposited during a marine transgression that began in the late Santonian and continued into the early Campanian (Mancini & Soens, 1994; Kennedy *et al.*, 1997).

Numerous site visits were made to an exposure of the Eutaw Formation exposed along the south bank of Luxapalila Creek in Lowndes County, Mississippi (figures 1 & 3). Field work at the site consisted of measuring the exposed vertical section, documenting the lithological variation within beds, and bulk sampling fossiliferous matrix. The bulk sampling yielded a highly diverse vertebrate assemblage, and the purpose of this report is to provide a detailed analysis of the elasmobranch species that were discovered. In addition, we revise taxonomic nomenclature for several tooth morphologies, discuss the paleobiogeographic distribution of species, comment on the paleobiology of species, and reconstruct the paleoecology at the time of deposition of the fossil deposit based on lithology and species content.

Previous work on Eutaw Formation Fossil Vertebrates

A wide variety of fossil vertebrates are found throughout the Eutaw Formation outcrop belt. Leidy (1873) described and illustrated (*i.e.*, pl. 28) a number of specimens that were collected by William Spillman from "Cretaceous sandstone near Columbus, Mississippi." The fossils were in fact recovered from the Tombigbee Sand Member, probably from Plymouth Bluff, in Lowndes County (Russel, 1986; Manning, 1994). Leidy (1873) identified several fish from Spillman's collection, including the teleosts *Pycnodus faba* (= *Anomoeodus phaseolus*; see also Leidy, 1872; Kriwet, 2002) and *Hadrodus priscus*, and the elasmobranchs *Ptychodus mortoni*,

Galeocерdo falcatus (= a mixture of *Squalicorax* sp. aff. *S. yangaensis* and *S. sp. cf. kaupi* as identified herein), *Oxyrhina extenta* (= *Cretoxyrhina mantelli*), *Lamna* sp. (= *Scapanorhynchus texanus*), and the chimaeroid *Eumylodus laqueatus*. Fish species associated with a mammal tooth recovered from the Tombigbee Sand Member at Vinton Bluff (Tombigbee River) in Clay County, Mississippi, were identified as *Hybodus* sp., *Squalicorax* sp., *Cretalamna* sp., *Striatolamia* sp., *Ptychodus* cf. *P. mortoni*, cf. *Dasyatis* sp., *Raja* sp., *Ginglymostoma* sp., *Otodus* sp., *Ischyrrhiza* sp., and *Rhincodon* sp. (see Emry *et al.*, 1981). The pycnodont *Anomoeodus* was also reported by Emry *et al.* (1981), and Hooks *et al.* (1999) documented *Phacodus punctatus* from the Tombigbee Sand Member in both Mississippi (Clay County) and Alabama (Dallas County).

Numerous fish taxa have been reported from the Eutaw Formation of Alabama, and Meyer (1974) was the first to conduct a study of the fossil elasmobranchs. Whetstone and Collins (1982) identified a small ichthyofauna they collected in Montgomery County, including the elasmobranchs *Hybodus* sp., *Ptychotrygon* sp., *Scapanorhynchus* sp., *Cretalamna* sp., *Odontaspis* sp., *Squalicorax* sp., and bony fish *Belonostomus* sp. and *Enchodus* sp. Lamb *et al.* (1991) later updated the Montgomery County fish assemblage and listed *Cretoxyrhina mantelli*, *Cretalamna appendiculata*, *Ptychodus mortoni*, *Scapanorhynchus texanus*, and *Squalicorax kaupi*, along with bony fish *Bananogmius*, *Enchodus*, *Pachyrhizodus*, and *Xiphactinus*. The large coelacanth *Megalocoelacanthus dobiei* also occurs in the Eutaw Formation (Schwimmer *et al.*, 1994). More recently, Ciampaglio *et al.* (2013) reported a variety of fossil fish from Greene County, but this assemblage could consist of a mixture of material from the Eutaw Formation and overlying Mooreville Chalk Formation.

Reptilian remains from the Eutaw Formation include a partial hadrosaurine dinosaur collected along the Tombigbee River near Columbus, Mississippi (Kaye & Russel, 1973). Lamb *et al.* (1991) also documented a number of reptiles, including a toxochelyid turtle, a plesiosaur, two crocodylians, three mosasaurs (*Tylosaurus* was identified by Kiernan [2002]), and dinosaurs. Schwimmer and others (1985) reported the occurrence of two pterosaur bones from the Eutaw Formation of Chatahoochee County, Georgia. Birds also inhabited the region

of Eutaw Formation deposition, as numerous feathers have been collected from estuarine deposits of the Ingersoll Shale in Russell County, Alabama (Knight & Bingham, 2007; Bingham *et al.*, 2008).

Geology and Geologic Setting

The locality discussed herein occurs along low banks on the south side of Luxapalila Creek in Columbus, Lowndes County, Mississippi

(figure 1). An approximately 1.3 km exposure of predominantly clay and sandy clay beds of the Eutaw Formation were exposed. Within the exposed section, a clastic macrofossil-bearing layer (referred to herein as the "Lux lag") ranging in thickness from 21 cm to 87 cm is bounded above and below by thinly laminated clays with lignite interlaminae (see figure 3). In a few places, variably bedded sands exhibiting occasional *Ophiomorpha* trace fossils were observed. These strata are traditionally associated with the lower Eutaw Formation.

The Lux lag is coarse, glauconitic, fossil-rich, fining upwards, and contains a relatively dense concentration of whole and fragmented bones, teeth, coprolites, macroinvertebrate skeletal debris (now completely leached but represented by phosphatic steinkerns), silicified and lignitized wood, pebbles and other rock clasts, medium to coarse quartz sand (many grains are spherical), occasional rose quartz and garnet grains, as well as muscovite and biotite mica. The larger bones, bone fragments, pebbles, and other clasts (teeth) are typically found in the lower part of the Lux lag, whereas the upper part contains a greater abundance of the smaller clast types, mostly fish teeth, scales, denticles, spines, and very small rounded pebbles. The vertebrate fossil content of the Lux lag consists of a mixture of various terrestrial, brackish water, and fully marine taxa. Bone, teeth, and coprolites show variable amounts of wear and breakage.

The Lux lag is located between ripple laminated clay and thinly bedded clay facies that have consistently been associated with the Eutaw Member in Mississippi (Stephenson & Monroe, 1940; Kaye, 1955) and Alabama (Wahl, 1966; Soens, 1984; Puckett, 1997). Stratigraphically, the Lux lag occurs more than three meters below massive-bedded, fine-grained and fossiliferous sands of the Tombigbee Sand Member. A major disconformity between the Eutaw and Tombigbee Sand members is thought to represent the first transgressive surface within the Upper Zuni A Gulf Coast-3.0 (UZAGC) depositional cycle of Mancini *et al.* (1995). This Gulf Coast cycle correlates to the third order cycles 3.4 and 3.5 within UZA-3 of Haq *et al.* (1988). Mancini *et al.* (1995) defined the transgressive surface of UZAGC-3.0 as the boundary between low stand systems tract deposits of the Eutaw Member and transgressive systems tract deposits of the supradjacent Tombigbee Sand Mem-

ber. A fossil-rich lag occurring at the base of the Tombigbee Sand is similar in faunal composition to the Lux lag.

The UZAGC-3.0 transgressive surface and associated lag at the base of the Tombigbee Sand Member have been studied in Greene County, Alabama by Becker *et al.* (1998), who provided a model for transgressive lag accumulation. In their model, fine sediment was winnowed from pre-existing clast-bearing, fossiliferous beds (of the lower Eutaw Formation) by the descending wave base during a net marine regression late in a low stand systems tract. However, we envision a different scenario for the formation of the Lux lag. Although the possibility of time-averaged reworking cannot be ruled out, the condition of the fossils (teeth are not rounded and polished) and the overall species content indicate that the Lux lag accumulated within a somewhat turbid shallow marine, nearshore environment. The Lux lag may represent a condensed zone within the third-order cycle Upper Zuni A 3.4 (see Haq *et al.*, 1988).

Age of Deposits

Biostratigraphic and radiometric work on Eutaw Formation deposits within the Tombigbee River valley in east-central Mississippi has yielded relative ages of upper Santonian and lower Campanian. These studies include biozonal measurements taken by Dowsett (1989), Mancini & Soens (1994) and Puckett (2005) at several sites along the Tombigbee River, including the type locality of the Tombigbee Sand at Plymouth Bluff. Kennedy & Cobban (1991) and Kennedy *et al.* (1997) analyzed a suite of ammonite species collected from different stratigraphic levels within the Tombigbee Sand Member at Plymouth Bluff (Columbus Lock and Dam) and other sites along the river. Russel (1986) examined planktonic foraminifera and nannoplankton from the Tombigbee Sand Member at Plymouth Bluff. Emry *et al.* (1981) considered their Mississippi vertebrate fauna to be of late Santonian age, but further to the east Lamb *et al.* (1991) and Becker *et al.* (1998) found that latest Santonian and early Campanian species of ammonites occur with vertebrate fossils, indicating that the Santonian/Campanian boundary is contained within the basal Tombigbee Sand lag in that area. Obradovich *et al.* (1993) obtained an absolute age of 84.09 ± 0.4 Ma from

sanidine crystals collected in bentonite beds within the lower part of the Tombigbee Sand Member south of Aberdeen, 15 miles north and along strike of Plymouth Bluff and the Luxapalila Creek. The International Commission on Stratigraphy (ICS, 2012) placed the Santonian-Campanian boundary at 83.5 $\pm$ 0.7 Ma, and the Lux lag would be latest Santonian based on its stratigraphic position 3 m below the Tombigbee Sand. If the Lux lag represents the Upper Zuni A 3.4 condensed zone, the absolute age is closer to 83.75 Ma based on the dating results of Haq *et al.* (1988).

Institutional Abbreviations

The fossils from the Luxapalila Creek site that we examined and photographed are housed at:

MMNS, Mississippi Museum of Nature and Science, Jackson;
SC, South Carolina State Museum, Columbia.

Additional fossils are located at:

Wright State University, Celina, Ohio.

Methods

Vertebrate fossils were recovered from the site through surface collecting and bulk sampling. Bulk matrix samples were processed in the laboratory, with sediment being disaggregated in 5 gallon buckets of water and then gently screened with USA Standard Testing Sieves down to 0.25 mm (# 60 screen). The remaining concentrates were examined under a microscope. Specimens under 1 cm in greatest dimension were mounted to 1 mm - head insect pins with carbowax, and all specimens were photographed using a Nikon D7000 camera with an inverted Nikkor 28 mm fixed lens.

Numerous publications discussing dignathic, ontogenetic, and gynandric heterodonty within extant elasmobranch species include, among others, Feduccia & Slaughter (1974), Gruber & Compagno, (1981), Powlik (1995), Kajiura & Tricas (1996), Shimada (2002, 2005), Summers *et al.* (2004), Purdy & Francis (2007), and Gutteridge & Bennett (2014). All could serve as a guide when attempting to interpret heterodonty within fossil elasmobranch species. The results of previous studies on Eutaw Formation

elasmobranch teeth by Meyer (1974) and Case *et al.* (2001), notably morphological variation and taxonomic assignments, had a particular bearing on the present report.

Systematic Paleontology

Hybodontoidae

Hybodontidae Owen, 1846

Meristodonoides Underwood & Cumbaa, 2010

Meristodonoides multiplicatus n. sp.

Figures 4 & 5

Holotype – MMNS 5603, lateral tooth crown.

Paratypes – MMNS 5310.1, complete lateral tooth; MMNS 3264.1, large tooth cusp; SC2012.48.8, incomplete anterior tooth crown; SC2012.48.9, anterolateral tooth crown.

Etymology – Species name alludes to the numerous longitudinal ridges occurring on the labial (and particularly) lingual crown faces.

Additional material examined – MMNS 3264.2, large tooth cusp; MMNS 3264.3, 6 main cusps and 1 incomplete crown; MMNS 3264.4, anterolateral tooth crown; MMNS 5310.2, crown; MMNS 5310.3, six tooth cusps; SC2012.48.10, anterolateral tooth crown; SC2012.48.11, 11 incomplete tooth crowns; SC2012.48.12, crown main cusp; SC2012.48.13, incomplete miniscule crown; SC2012.48.14, 3 incomplete miniscule crowns; SC2012.48.15, 109 main cusps; MMNS 5474.1, fin spine fragment; MMNS 5474.2, two fin spine fragments; MMNS 5599, fin spine fragment; MMNS 5600, fin spine fragment.

Remarks – Interpreting tooth morphology and potential heterodonty within our sample was difficult because of the incompleteness of the material. Of the 143 specimens, only one is complete (MMNS 5310.1), five are crowns preserving at least part of the mesial and distal shoulders, 17 are crowns preserving either the mesial or distal shoulder, and 120 consist of only the main cusp of the tooth crown. However, our sample exhibits some variation with regard to cusp shape, lateral cusplet development, and crown ornamentation. We identified anterior and lateral tooth positions using Maisey's (1983) reconstruction of the *Egertonodus basanus* (see Maisey, 1987) dentition as a guide. Presumed anterior teeth have a tall and vertical or slightly distally oriented main cusp

Figure 4. Hybodont shark teeth, *Meristodonoides multiplicatus* n. sp., from the Eutaw Formation at Luxapalila Creek, Mississippi. A-B, holotype, MMNS 5603, in A) labial, B) lingual views. J-L, paratype, SC2012.48.9, in J) labial, K) lingual, L) mesial views. M-O, dorsal fin spine fragments. MMNS 5599 in M) lateral view. MMNS 5474.1 in N) anterior, O) lateral views. Labial is at right in I, at left in L. Scale bars = 1 mm. Photographs by K.E. Runyon.

and apparently a single pair of lateral cusplets of rather equal height. Lateral teeth have a lower and more obviously distally inclined main cusp, a wider crown base, and two pairs of lateral cusplets. The holotype, MMNS 5603, shows that the first pair of lateral cusplets is larger than the second, and interestingly that the mesial cusplets are poorly differentiated from the crown shoulder (figure 4A-B). In contrast, the first mesial and distal cusplet on MMNS 5310.1, a complete tooth and paratype, are of equal size, with only a vestigial second mesial cusplet (this area is damaged on the distal side; see figure 4C-D). Two teeth, MMNS 5310.2 and SC 2012.48.10, exhibit an intermediate morphology between our proposed anterior and posterior jaw positions. Both specimens have a single pair of lateral cusplets, but the main cusp is distally inclined as in the holotype (figure 5A-B & G-H). The potential significance of this is uncertain, but could indicate that anterior teeth furthest from the symphysis have sharply inclined cusps or lateral teeth closer to the symphysis had only a single pair of lateral cusplets. Both

MMNS 5310.2 and SC 2012.48.10 are smaller than MMNS 5603, and they could represent a younger growth stage where lateral teeth have only a single pair of lateral cusplets (see additional discussion on ontogenetic heterodonty below).

The labial and lingual crown faces of all of the teeth bear longitudinal ridges, with those on the lingual face being noticeably more robust than those on the labial face. Whereas the labial ridges are generally restricted to the lower one third of the main cusp (but may extend to one half the cusp height, particularly at the side of the cusp), lingual ridges extend one half to four fifths or more of the cusp height. Ridges on the lateral cusplets on both sides extend to the apex or nearly so.

In general, the main cusps are conical to subconical and have a highly convex labial crown foot. Several specimens, those greater than 8 mm in height, have a more broadly triangular cusp (in labial view) with flatter labial crown foot. This is particularly true for two specimens, MMNS 3264.1 and MMNS 3264.2, the dimen-

Figure 5. Hybodont shark teeth, *Meristodonoides multiplicatus* n. sp. from the Eutaw Formation at Luxapalila Creek, Mississippi. A-B, MMNS 5301.2 in A) lingual, B) labial views. C-D, MMNS 3264.2 in C) labial, D) lingual views. E-F, MMNS 3264.4 in E) labial, F) lingual views. G-I, SC2012.48.10 in G) labial, H) lingual, I) mesial views. sions of which are approximately 11 mm in height and 8 to 9 mm width (see figures 4E-F & 5C-D). These crowns are labio-lingually flattened, with concave baso-medial surfaces on the labial and lingual faces. The nature of the lateral cusplets is unknown, but labial and lingual ornamentation is consistent with what was observed on more conical specimens.

Although the possibility that these variations in morphology represent more than one species cannot be ruled out, we believe that our sample represents heterodonty within a single species. Maisey (1983) noted that cusplet morphology and number within *E. basanus* varied, as did the development of labial and lingual ornamentation. Maisey's (1983) reconstructed *E. basanus* dentition, based on a specimen in which the teeth are preserved *in situ* on the jaws, shows monognathic heterodonty (p. 49, fig. 20), with main cusps of anterior teeth being more erect than on lateral teeth, and cusp height decreasing but distal inclination increasing posteriorly. Dignathic heterodonty is also indicated by the comparatively smaller size and narrower main cusp of upper teeth. Monognathic (and possibly dignathic) heterodonty within *M. multiplicatus* is comparable to *E. basanus*, but our sample of isolated teeth also appears to reflect ontogenetic heterodonty within *M. multiplicatus*. As tooth size increases, so do the number of labial and lingual longitudinal ridges, and the main cusp becomes less conical and more broadly triangular (*i.e.*, main cusps become wider into adulthood). Additionally, cusplets may not have formed until the teeth were at least 6 mm in

height, as four teeth in our sample, 2.5 mm to 4.5 mm in height, are apparently devoid of cusplets (at least on the side preserved) and instead have an elongated shoulder bearing a straight cutting edge (see figure 5, L-M).

Underwood & Cumbaa (2010) recently erected *Meristodonoides* to include hybodont tooth morphologies like the ones described above. In the process they also synonymized with the new genus several species that had been assigned to *Hybodus*, including post-Coniacian *H. montanensis* (Case, 1978) and *H. novojerseyensis* (Case & Cappetta, 2004). Two morphotypes occurring together in Campanian strata of the Western Interior Seaway were identified as separate species based on tooth size, development of lateral cusplets, and formation of crown ornamentation. These morphologies were originally identified as *Hybodus montanensis* and *H. wyomingensis* by Case (1978, 1987a), but Rees (1999) has since suggested that the morphologies represented ontogenetic heterodonty within the *montanensis* species. This species has been assigned to *Meristodonoides* by Underwood & Cumbaa (2010). The Eutaw teeth differ from the *montanensis* and *wyomingensis* morphologies in that the crown ornamentation is much more extensive, reaching up to one half the crown height on the labial face and up to four fifths the height on the lingual face, and anterior teeth of *montanensis* apparently lack lateral cusplets (present on Eutaw anterior teeth except for specimens less than 5 mm in height). Teeth of Campanian-Maastrichtian *M. novojerseyensis* are nearly devoid of ornamenta-

tion at the center of the labial face, the ridges on the lingual face are shorter, and lateral cusplets, of which there are up to two pairs, appear to be taller than on the Eutaw teeth (see Case & Capetta, 2004).

It is difficult to put into perspective the specimens that Meyer (1974) collected during his study. He identified *Hybodus* sp. aff. *H. bulteri* from Santonian and Campanian strata of the Mississippi Embayment, including the Eutaw Formation in eastern Mississippi. All of his specimens are incomplete and the morphology of the lateral shoulders is unknown. Differences in crown ornamentation could be related to heterodonty or be indicative of more than one species. However, the specimens Meyer (1974) illustrated (fig. 7) appear to be within the range of variation we observed in our sample. Bourdon *et al.* (2011) tentatively identified three different hybodont genera within their Santonian sample from New Mexico. Their discussion regarding teeth that they referred to *M. montanensis* was limited to specimens preserving the main cusp and at least one lateral shoulder, and it appears that all of these specimens were rather small (less than 9 mm in crown width). Although the New Mexico specimens are similar to teeth of equivalent size in our sample in that they lack pronounced cusplets, they differ in having labial and lingual crown ridges that are less than one half lingual cusp height, as opposed to half or more on the Mississippi sample.

Several of the dorsal fin spine fragments in our sample preserve enough ornamentation to allow us to conclude that they are conspecific with the specimen illustrated by Case *et al.* (2001: pl. 1, figs.5-7) from the Eutaw Formation of Georgia. The spine ornamentation, consisting of a series of oblique enameloid ridges that transition postero-apically into enameloid-covered tubercles, leads us to associate the morphology with *Meristodonoides* rather than *Lonchidion*, which apparently has ornamentation consisting of multiple ridges running parallel to spine length (*i.e.*, Estes, 1964; Duffin, 1985; see figure 7A-B). It should be noted here that the fin spines attributed to *M. montanensis* and *H. wyomingensis* by Case (1978, 1987a, respectively) are very similar to each other and compare favorably with spines attributed to *Lonchidion*.

Lonchidiidae Herman, 1977

Lonchidion Estes, 1964

Lonchidion cristatum n. sp.

Figure 6

Holotype – SC2012.48.71, tooth crown.

Paratypes – SC2012.48.72, tooth crown; SC2012.48.74, incomplete tooth crown; SC2012.48.75, tooth crown.

Additional material examined – MMNS 5477, tooth crown; SC2012.48.73, 2 tooth crowns; SC2012.48.76, 2 tooth crowns; SC2012.48.77, 2 ablated teeth.

Etymology – The species name alludes to the crests (ridges) occurring at various locations on the tooth crown.

Diagnosis – The teeth measure up to 4 mm in width. All specimens have a robust transverse crest extending the width of the crown, a small crest on the labial protuberance, and a short vertical medial crest on the lingual face. The root is unknown.

Description – Two morphotypes are included in the sample, the first of which has a greatly expanded labial crown face and resulting sub-triangular outline in occlusal view, and a labial protuberance that is not well differentiated from the labial margin (see figure 6A-H). The occlusal surface is convex with a blunt central apex, and the crown appears arched in labial view. There is no indication of accessory cusplets along the transverse crest, but nodes may occur on the labial and/or lingual side of this crest. The labial protuberance bears a bifurcated ridge.

The second morphotype, of which four specimens are available, consists of a wide (reconstructed width approximately 4 mm), labio-lingually narrow crown that is straight in both occlusal and labial views (figure 6I-P). The labial protuberance is clearly differentiated from the labial face, and it bears a simple crest. The transverse crest divides the occlusal surface into nearly equal labial and lingual parts, and there is no evidence of a medial cusp or accessory cusplets.

Remarks – Although the morphotypes are quite different from each other we consider them to be conspecific based on the nature of the transverse crest, the presence of a crest on the labial protuberance, and a medial longitudinal crest on the lingual face. We believe

Figure 6. Hybodont shark teeth, *Lonchidion cristatum* n.sp., from the Eutaw Formation at Luxapalila Creek, Mississippi. A-D, holotype, SC2012.48.71, in A) occlusal, B) labial, C) lingual, D) basal views. E-H, paratype, SC2012.48.72, in E) occlusal, F) labial, G) lingual, H) basal views. I-L, paratype, SC2012.48.74, in I) occlusal, J) labial, K) lingual, L) basal views. M-P, paratype, SC2012.48.75, M) occlusal, N) labial, O) lingual, P) basal views. Labial at top in occlusal and basal views. Scale bars = 1 mm. Photographs by K.E. Runyon.

the morphologies represent monognathic heterodonty within a single individual, with the holotype morphology (*i.e.*, figure 6A) being located in anterior jaw positions, whereas the other morphology occupying more lateral and/or posterior positions (*i.e.*, figure 6I; see also Duffin, 1985: fig. 12).

The generic assignment of Cretaceous teeth of similar morphology has changed over the years, having gone full circle from *Lonchidion* (*i.e.*, Estes, 1964) to *Lissodus* (*i.e.*, Cappetta & Case, 1975a; Duffin, 1985) and back to *Lonchidion* (Rees & Underwood, 2002). Meyer (1974) collected several teeth from the Eutaw Formation that he tentatively identified as *Lonchidion breve*. Meyer (1974) based his identifications on the work of Patterson (1966), who erected several subspecies of *L. breve* from the early Cretaceous of England. Duffin (1985) later elevated these morphologies to species status, but none of these satisfactorily compares with *L. cristatum* n. sp. Crowns of *L.*

breve are smaller in overall size and lack crests on the labial protuberance and lingual face, as well as accessory ornamentation as seen on our holotype. *Lonchidion crenulatum* and *L. pustulatum* are more similar to *L. cristatum* n. sp. in overall morphology, but they are smaller in overall size, lack a lingual vertical crest, and have crenulated transverse crests and accessory cusplets and/or vertical striations. Three other North American species, Albian *L. anitae*, Campanian *L. griffisi*, and Maastrichtian *L. selachos* bear multiple cusplets (see Estes, 1964; Thurmond, 1971; Case, 1987a). Campanian *L. babulskii* is wider than *L. cristatum* n. sp., lacks the robust transverse crest, and is devoid of other ornamentation except for an occasional, non-bifurcated crest on the labial protuberance (see Cappetta & Case, 1975a). Cenomanian *L. weltoni* is smaller in overall size than *L. cristatum* n. sp. but generally bears a much larger medial cusp that may be striated (Duffin, 1985).

Hybodontidae or Lonchidiidae

Figure 7A-M

Material examined – MMNS 3265, cephalic spine crown; MMNS 5482, cephalic spine crown; MMNS 5496, incomplete cephalic spine; MMNS 5598, incomplete cephalic spine crown; MMNS 5604, incomplete cephalic spine and unassociated cephalic spine crown; MMNS 5606, cephalic spine crown apex; MMNS 5607, cephalic spine base; MMNS 5622, three incomplete cephalic spines; MMNS 5623, 13 incomplete cephalic spines;

Remarks – Hybodont cephalic spines occur as paired elements, and there may be one or two pairs on the head, depending on species. Cephalic spines are known to have been located just above and behind the orbit, over the lateral otic process, and in the region of the parietal fossa (see Maisey, 1982). Two distinctive morphologies are represented in our sample, one of which is symmetrical and consists of a base bearing a posteriorly curving crown at the anterior end, posteriorly directed lateral wings and a posterior, dorsally directed projection. These spines are similar to those illustrated by Bermúdez-Rochas (2009: fig. 4, 2a-3b), but the exact morphology of the anterior crown projection of the Eutaw specimens is unknown because it is not preserved. Smaller spines grouped into this category lack lateral projections, but it is unclear if these represent the second of two sets of paired spines, or if these specimens represent a juvenile growth stage.

The second spine morphology, much larger in size, is quite unlike the one previously described. The larger spines emanate from the anterior end of a thickened, reniform base. The crown is laterally compressed, sharply curved posteriorly and slightly retrorse, inclined away from the middle of the head, and occupies at least half of the dorsal surface of the base. Ornamentation consists of fine discontinuous ridges on lateral, posterior, and medial surfaces. The crown apex is smooth and pointed, with a sharp carina extending onto the dorsal surface of a large posterior barb (figure 7D-F). Following Maisey (1982), it is possible to determine from which side of the head a spine was located, even for specimens consisting of just the base or just the crown. For spine bases, the medial lobe indicates the part of the spine closer to the

sagittal midline of the head (*i.e.*, the lobe being on the right indicates that the spine was on the left side of the head; see figure 7J). The crowns curve slightly medially, and lateral ornamentation is more robust and obliquely intersects an inconspicuous anterior carina (figure 7F, H, L).

The taxonomic utility of isolated cephalic spines may be limited, as morphologies similar to figures 7C & G have been attributed to *Meristodonoides novojerseyensis* (Case & Cappetta, 2004), *Hybodus* (Maisey, 1982, 1983), *Lonchidion* (Maisey, 1982; Duffin, 1985) and even Triassic *Asteracanthus* (Rieppel, 1981).

Neoselachii(?) Compagno, 1977

Ptychodontidae Jaekel, 1898

Ptychodus mortoni Agassiz, 1839

Figure 7N-P

Material examined – MMNS 3778, two teeth; MMNS 4527, two teeth; MMNS 5114, lateral tooth; MMNS 5309, lateral tooth; MMNS 5541, two teeth; MMNS 5523, six crown fragments.

Remarks – This tooth conforms to *P. mortoni* in having a robust conical cusp bearing radiating ridges that emanate from the apex and become finer and highly branching towards the crown base. The crowns of anterior-most teeth are symmetrical and have no clearly differentiated cusp, but cusps of lateral teeth are conspicuous from the marginal area and offset distally (*i.e.*, figure 7N-O).

Heterodontiformes Berg, 1940 (in part)

Heterodontidae Gray, 1851

Heterodontus Blainville, 1816

Heterodontus sp. aff. *H. rugosus* (Agassiz, 1839)

Figure 8A

Material examined – SC2012.48.34, crown fragment

Remarks – SC2012.48.34 is a portion of a large lateral tooth from an adult individual. There is a transverse edge that divides the crown into labial and lingual faces, with the labial face bearing a vermiculate pattern and the lingual face having a reticulated pattern. This ornamentation is similar to Campanian *H. rugosus*, but our identification is tentative due to the sample available to us. Meyer (1974) recovered teeth of *Heterodontus* from the Eutaw Forma-

Figure 7. Hybodont spines and *Ptychodus* tooth from the Eutaw Formation at Luxapalila Creek, Mississippi. A-B, *Lonchidion?* sp. dorsal fin spine, MMNS 6376, in A) left lateral, B) posterior views. tion of western Alabama, but it is difficult at this time to determine if that material is conspecific with SC2012.48.34.

Orectolobiformes Compagno, 1973
Hemiscylliidae Gill, 1862
Chiloscyllium Müller & Henle, 1837
Chiloscyllium sp.

Figure 8B-H

Material examined – SC2012.48.78, anterior tooth; SC2012.48.79, lateral tooth; SC2012.48.80, 3 incomplete teeth.

Remarks – These teeth might be confused with *Cantioscyllium grandis* n. sp., but they are distinguished by their much smaller overall size (1.5 mm or less in width), single pair of lateral cusplets, and lack of labial crown ornamentation. Meyer (1974) identified specimens from the Tombigbee Sand Member as *C. greeni*, but our sample is not sufficient to make a more specific determination.

Ginglymostomatidae Gill, 1862
Cantioscyllium Woodward, 1889
Cantioscyllium grandis new species

Figure 8I-P & 9

Holotype – SC2012.48.82, lateral tooth.

Paratypes – SC2012.48.81, anterior tooth; SC2012.48.83, lateral tooth; SC2012.48.84, lateral tooth.

Additional material examined – MMNS 5127.1, tooth; MMNS 5127.2, tooth; MMNS 5479, five teeth; SC2012.48.85, lateral tooth; SC2012.48.86, anterior? tooth; SC2012.48.87, 21 teeth; SC2012.48.88, tiny anterior tooth; SC2012.48.89, 3 tiny teeth; SC2012.48.117, lateral tooth.

Remarks – Our specimens are conspecific with *Cantioscyllium saginatus* erected by Meyer (1974), the holotype of which was collected from the Tombigbee Sand Member. The Santonian *saginatus* morphology differs from *Cantioscyllium decipiens* in its larger overall size,

Figure 8. Fossil shark teeth from the Eutaw Formation at Luxapalila Creek, Mississippi. A) *Heterodontus* sp. aff. *H. rugosus* lateral tooth, SC2012.48.34, in occlusal view. B-D, *Chiloscyllium* sp., SC2012.48.87, in B) labial, C) lingual, D) distal views. E-H, *Chiloscyllium* sp., SC2012.48.79, in E) labial, F) lingual, G) mesial, H) distal views. I-J, *Cantioscyllium grandis* n. sp., SC2012.48.85, in I) labial, J) lingual views. K-L, *C. grandis* n. sp., SC2012.48.117, in K) labial, L) lingual views. M-O, *C. grandis* n. sp., SC2012.48.88, in M) labial, N) lingual, O) distal views. P) *C. grandis* n. sp., MMNS 5127.2, in labial view. Labial at bottom in A. Scale bars = 1 mm. Photographs by K.E. Runyon.

more numerous pairs of lateral cusplets, and less pronounced labial ornamentation (see Cappetta, 1973). Unfortunately, the *saginatus* name is a nomen nudum because Meyer's work was never published. More than two decades after Meyer's work, *C. saginatus* was synonymized with *C. meyeri*, a morphology that occurs in Campanian and Maastrichtian strata (Case & Cappetta, 1997; Cappetta & Case, 1999; also Cicimurri, 2007). However, the *C. meyeri* morphology, as identified by Case & Cappetta (1997) and Cicimurri (2007), differs from the Santonian specimens in being smaller (smaller than *C. decipiens*), meso-distally narrower, and bearing fewer pairs of lateral cusplets. We therefore conclude that the Santonian morphology is not conspecific with *C. meyeri*. Teeth identified as *Cantioscyllium decipiens* from Santonian strata of New Mexico (Williamson *et al.*, 1989; Bourdon *et al.*, 2011) and as *Chiloscyllium* sp. from the Santonian of Georgia (Case *et al.*, 2001) appear to be conspecific with our Eutaw specimens.

The largest teeth in our sample are more than 5 mm in width, and all bear robust sinuous and bifurcating labial ridges extending from just above the crown foot to slightly below the apical margins. Some teeth also bear lingual rugosities near the lateral cusplets. Monognathic heterodonty is evident in our sample, with anterior and lateral positions being identified. Anterior teeth are symmetrical, whereas lateral teeth have a distally inclined cusp and a more elongated mesial side, and generally two pairs of lateral cusplets (second pair vestigial). One specimen appears to have had a third mesial cusplet. An ontogenetic series may be represented by SC2012.48.88, MMNS 5217.2, and SC2012.48.82, wherein as tooth size increased, so did crown robustness, formation of lateral cusplets, and development of ornamentation (see figures 8M-P & 9A-C, respectively).

Figure 9. Orectolobiform shark teeth, *Cantioscyllium grandis* n.sp., from the Eutaw Formation at Luxapalila Creek, Mississippi. Family incertae cedis
Columbusia Case *et al.*, 2001
Columbusia fragilis Case *et al.*, 2001

Figure 10

Material examined – MMNS 5484, one tooth; MMNS 5126.1, two teeth; 5126.2, tooth; 5126.3, tooth; SC2012.48.61, juvenile tooth;

SC2012.48.62, anterior tooth; SC2012.48.63, anterolateral tooth; SC2012.48.64, anterolateral tooth; SC2012.48.65, lateral tooth; SC2012.48.66, 33 teeth; SC2012.48.67, 6 incomplete teeth; SC2012.48.68, 38 incomplete teeth; SC2012.48.69, 4 incomplete teeth; SC2012.48.70, large tooth.

Remarks – We are able to emend the original diagnosis for this species (Case *et al.*, 2001)

based on the teeth in our sample. The cusp is conical, with very convex labial and lingual faces, and on all but two specimens it is erect and not distally inclined (and then only very slightly). Twelve specimens bear a short longitudinal ridge on the labial face (*i.e.*, figure 10M), but the remaining teeth lack this feature. Of the twelve teeth with the ridge, all but one is 1 mm or less in width, whereas the reconstructed width of the remaining specimen is 2 mm. The significance of this ridge, if any, is unknown.

Lateral shoulders are well separated from the cusp, and these may be short with a very convex cutting edge, or elongated with a rather straight edge. In occlusal view, the shoulders may extend straight out from the cusp base or their distal ends may be curved lingually. In labial view, the shoulders may be perpendicular to the cusp or extend obliquely from the cusp (figures 10A & Q, respectively). The former feature, combined with a high cusp and elongated basal protuberance, produces a cruciform labial outline. The cutting edge is sharp on the lateral shoulders and onto the lower

half of the cusp, but it becomes indistinct or absent altogether near the cusp apex (compare figures 10C & F).

The root is low, sub-triangular in basal view, and may have a flat or concave basal attachment surface. The root may be holaulocorhizous or hemiaulocorhizous. Teeth with hemiaulocorhizous roots have a large central basal foramen located more to the lingual side, and there is a small foramen at the vertical face of the lingual root margin. On teeth with holaulocorhizous roots, a deep groove extends to the lingual root margin, but the labial portion of the groove is very shallow. In general, a single small foramen is located at each side of a medial bulge on the dorsal surface of the lingual root projection (sometimes two), as well other tiny scattered foramina.

We consider some of the variation in tooth crown morphology to represent monognathic heterodonty, with crowns of presumed anterior teeth having short and cusp-like lateral shoulders (*i.e.*, figure 10A), whereas lateral teeth have more elongated and less convex shoulders (figure 10J). The root also becomes wider in more

Figure 10. Orectolobiform shark teeth, *Columbusia fragilis*, from the Eutaw Formation at Luxapalila Creek, Mississippi. A-C, SC2012.48.82 in A) labial, B) lingual, C) profile views. D-E, SC2012.48.63 in D) labial, E) lingual, F) profile views. G-I, SC2012.48.64 in G) labial, H) lingual, I) distal view. J-L, SC2012.48.65 in J) labial, K) lingual, L) profile views. M-O, SC2012.48.61 in M) labial, N) lingual, O) profile views. P) SC2012.48.70 in labial view. Q-R, MMNS 5126.2 in Q) labial, R) lingual views. Scale bars = 1 mm. Photographs by K.E. Runyon.

lateral positions, and although the cusp remains rather erect (some distal inclination was observed) it becomes lower. Ontogenetic heterodonty is also apparent, with the tiniest teeth (0.5 mm in width or less) being gracile and having a very narrow cusp, very narrow and elongate labial basal protuberance, and sharper labial longitudinal ridge that is bifurcated. As tooth size increases, the cusp becomes broader and the cutting edge more restricted to the cusp base and lateral shoulders, and the basal protuberance becomes shorter and wider (compare figures 10M & P).

Cappetta (2012) has allied *Columbusia* with sclerorhynchid rays based on the superficial similarity of the tooth root to some species within Sclerorhynchoidei. However, *Columbusia fragilis* is very similar to *Cretorectolobus*, an orectolobiform shark, in its overall morphology, and both genera have roots that may be holaulocorhizous or hemiaulocorhizous (Case, 1978; Siverson, 1995; Underwood & Cumbaa, 2010). We add *Columbusia* to an undetermined orectolobiform family that also includes *Cretorectolobus* (see also Siverson, 1995; Underwood & Cumbaa, 2010). *Columbusia fragilis* differs from *Cretorectolobus* in having a narrower, very conical and nearly always erect (not distally inclined) cusp, the labial basal protuberance is narrower and much more elongated, the cutting edge, although smooth and sharp across the lateral shoulders and onto the base of the cusp, may not be well developed apically, there is no lingual enameloid-covered uvula, and there are fewer foraminae on the dorsal surface of the lingual root projection.

Lamniformes Berg, 1958

Anacoracidae Casier, 1947

Squalicorax Whitley, 1939

Squalicorax sp. aff. *S. yangaensis* (Darteville & Casier, 1943)

Figure 11A-H

Material examined – MMNS 3501.1, 39 teeth; MMNS 4711.1, 33 teeth; MMNS 4711.2, small tooth; SC2012.48.1, anterior tooth; SC2012.48.2 anterolateral tooth; SC2012.48.3, lateral tooth; SC2012.48.4, 50 teeth; SC2012.48.6, 55 incomplete teeth.

Remarks – The mesial edge is most convex medially, and the serrations in this region are also the largest and often compound. The crowns appear to be constricted at the base of the cusp due to a notch between the distal edge and distal heel, and a concavity near the base of the mesial edge (particularly in figure 11E-F). The convexity of the mesial edge lessens towards the commissure. The distal edge varies from convex to straight.

Multiple jaw positions are represented in our sample, including anterior, lateral, and posterior files. Anterior-most teeth have a rather vertical cusp that has a convex mesial edge and shorter but equally convex distal edge. Teeth in more lateral positions have broader and more distally directed cusps, a more elongated distal heel, and the mesial notch is less conspicuous. Posterior teeth have a low and highly distally directed cusp. Pronounced in vivo wear was observed on two teeth, where the upper half of the cusp was broken and the exposed surface subsequently worn smooth (the teeth are in otherwise pristine condition).

Although of similar size to *Squalicorax kaupi*, our Eutaw sample differs from that species in that there is a distinctive constriction near the base of the crown. This feature is consistent with two species reported from the upper Cretaceous of Africa, *S. yangaensis* (Campanian; see Darteville & Casier, 1943) and *S. bassanii* (Maastrichtian, see Gemmellaro, 1920). Some of the teeth are reminiscent of *S. bassanii* in having simple serrations of consistent size. However, most specimens are more like *S. yangaensis* and exhibit very large, compound serrations on the most convex part of the mesial edge, and we therefore assign our sample to this latter species.

At least some of the Tombigbee Sand specimens that Meyer (1974) identified as *S. kaupi* are conspecific with our *S. sp. aff. S. yangaensis*. The assignment of identical Eutaw Formation teeth to *S. falcatus* by Case *et al.* (2001) may have followed Leidy (1873), who identified specimens from Mississippi as *Galeocerdo* (= *Squalicorax*) *falcatus*. *Squalicorax yangaensis* has been reported from New Mexico, an area that was situated at the southwestern portion of the Western Interior Seaway during the Santonian (Williamson *et al.*, 1989; Wolberg & Bellis, 1989; Bourdon *et al.*, 2011).

Squalicorax sp. cf. *S. kaupi* Agassiz, 1843

Figure 11I-L

Material examined – MMNS 3501.2, incomplete tooth; SC2012.48.6, incomplete tooth.

Remarks – The two teeth in our sample lack the distal heel and much of the root. The preserved crowns differ from *S. sp. aff. S. yangaensis* in that there is no concavity near the base of the mesial edge, and the simple serrations are smaller, more uniform in size, and mesially curving. In these respects the two teeth are similar to those identified as *S. kaupi* from Campanian strata of the US Western Interior and Gulf and Atlantic Coastal plains (i.e., Cappetta & Case, 1975a; Case, 1987a; Lauginiger & Hartstein, 1983; Manning & Dockery, 1992). Bourdon *et al.* (2011) identified similar teeth from the Santonian of New Mexico as *S. lindstromi* and suggested that this species name (following Einarsson *et al.*, 2010) be applied to North American Santonian to Maastrixtian teeth previously identified as *S. kaupi*. A

detailed comparison of the North American material to *S. lindstromi* remains to be undertaken, and Davis (1890) himself did not provide a direct comparison to *S. kaupi*, stating only that “Whilst recognizing the possibility that many of the specimens now supposed to represent separate species may ultimately be proved to have been associated in the same jaws, it may be advantageous to consider them as distinct until material shall be acquired which will render their determination certain.” Leidy’s (1873) sample of teeth from the Eutaw Formation of Mississippi, which he identified as *Galeocerdo* (= *Squalicorax*) *falcatus*, contains a mixture of *S. sp. aff. S. yangaensis* and *S. sp. cf. S. kaupi*.

Figure 11M-N

Material examined – SC2012.48.7, anterior tooth.

Figure 11. Anacoracid shark teeth from the Eutaw Formation at Luxapalila Creek, Mississippi. A-B, *Squalicorax* sp. aff. *S. yangaensis*, MMNS 4711.2, in A) labial, B) lingual views. C-D, *Squalicorax* sp. aff. *S. yangaensis*, SC2012.48.1, in C) labial, D) lingual views. E-F, *Squalicorax* sp. aff. *S. yangaensis*, SC2012.48.3 in E) labial, F) lingual views. G-H, *Squalicorax* sp. aff. *S. yangaensis*, SC2012.48.2, in G) labial, H) lingual views. I-J, *Squalicorax* sp. aff. *S. kaupi*, MMNS 3501, in I) labial, J) lingual views. K-L, *Squalicorax* sp. aff. *S. kaupi*, SC2012.48.6, in K) labial, L) lingual views. M-N, ?*Scindcorax* sp., SC2012.48.7, in M) labial, N) lingual views. Scale bars = 1 mm. Photographs by K.E. Runyon.

Remarks – SC2012.48.7 is morphologically similar to material Bourdon *et al.* (2011) identified as a new anacoracid taxon, *Scindcorax*. It is the smallest anacoracid tooth in our sample, measuring slightly over 3 mm in width and 4 mm in total height, and more gracile in its appearance than the next smallest anacoracid tooth in our sample, which measures 5 mm in width and height (see figure 11A-B). This latter tooth is regarded as representing a young growth stage of *S. sp. aff. S. yangaensis*, and it is entirely possible that SC2012.48.7 belonged to an even younger individual, rather than a distinctly diminutive anacoracid species. The possibility that this morphology represents ontogenetic variation within *Squalicorax sp. cf. S. yangaensis* was not discussed by Bourdon *et al.* (2011) when naming *Scindcorax*.

Mitsukurinidae Jordan, 1898
Scapanorhynchus Woodward, 1889
Scapanorhynchus texanus (Roemer, 1849)

Figure 12

Material examined – MMNS 5485; incomplete pathological lateral tooth; MMNS 5517.1, large lateral tooth; MMNS 5517.2, 7 large lateral teeth; MMNS 5525.1, anterior tooth; MMNS 5525.2, 79 small lateral teeth; MMNS 5614, 64 teeth; MMNS 5615, 40 small anterior teeth; MMNS 5616.1, symphyseal tooth; MMNS 5616.2, 6 symphyseal teeth; MMNS 5617, 32 small to medium teeth; MMNS 5620, latero-posterior tooth; MMNS 5624, 4 distal lateral teeth; MMNS 5625, 2 posterior teeth; MMNS 5626, posterior tooth; MMNS 5629, 4 lateral and posterior teeth; MMNS 5630, 5 symphyseal teeth; MMNS 5631, symphyseal tooth; SC2012.48.16, anterior tooth; SC2012.48.17, 3 large lateral teeth; SC2012.48.18, 14 incomplete teeth; SC2012.48.19, 230 teeth; SC2012.48.20, 177 tooth crowns; SC2012.48.21, anterior tooth; SC2012.48.22, anterolateral tooth; SC2012.48.23, lateral tooth; SC2012.48.24, 13 symphyseal teeth; SC2012.48.25, 4 posterior teeth; SC2012.48.26, lateral tooth; SC2012.48.27, anterolateral tooth; SC2012.48.28, anterolateral tooth; SC2012.48.29, lateral tooth; SC2012.48.37, two pathologic teeth; SC2012.48.96, anterior tooth, SC2012.48.114, tiny anterior tooth; SC2012.48.115, tiny lateral tooth; SC2012.48.116, 6 tiny teeth.

Remarks – Monognathic, dignathic, and ontogenetic heterodonty are evident in our sample. Symphyseal, anterior, lateral and posterior jaw positions can be distinguished, and lower teeth appear to be more symmetrical than upper teeth (which are more distally inclined than lowers). The various tooth morphologies have been described in detail by Meyer (1974) and Cappetta & Case (1975a), but in brief the teeth that we consider to have been on or just lateral to the symphysis have a tall and very narrow sigmoidal crown that lacks lateral cusplets, and laterally compressed root with poorly differentiated, asymmetrical lobes (figure 12A-B). Other teeth, which may have been just to the side of the symphysis (= parasymphysal) are not as laterally compressed, have a single pair of minute to moderately developed lateral cusplets, and more elongated root lobes. One specimen of this type has a tiny distal cusplet, but there is an elongated mesial enameloid shoulder extending onto the root lobe. Anterior teeth are distinguished by their high, narrow, sigmoidal crowns and elongated, diverging root lobes. At least in the first anterior tooth, the crown lacks lateral cusplets (*i.e.*, figure 12C-D), but more laterally situated anterior teeth have shorter root lobes that are highly divergent, and one pair of lateral cusplets is conspicuous (figure 12S-T). Teeth in lateral positions have a much broader and labio-lingually thinner crown that is often distally inclined, and lateral cusplets are broadly triangular with sharp cutting edges (figure 12M-N). The roots of lateral teeth are short and sub-rectangular, and the mesial lobe may be slightly more elongated. Posterior teeth have a low and highly distally curved crown and large triangular lateral cusplets.

We believe that Meyer's (1974) interpretation of ontogenetic heterodonty in *S. texanus* is correct. On anterior teeth, the number of lingual longitudinal ridges increases with tooth size, and lateral cusplets decrease in size or are absent altogether. It is our observation that anterior teeth of less than 10 mm in crown height have rather tall needle-like cusplets (figure 12O-P), whereas relatively few of the 120+ anterior teeth 12 mm or greater in height show any indication of lateral cusplets (figure 12E-F). Our sample also indicates that as lateral teeth increase in size, the crown becomes wider, the lateral cusplets become lower and broader, and the lingual crown ornamentation becomes re-

Figure 12. Mitsukurinid shark teeth, *Scapanorhynchus texanus*, from the Eutaw Formation at Luxapalila Creek, Mississippi. A-B, symphyseal tooth, MMNS 5616.1, in A) lingual, B) profile views. I-J, SC2012.48.23 in I) lingual, J) labial views. K-L, SC2012.48.26 in K) lingual, L) labial views. M-N, MMNS 5517.1 in M) lingual, N) labial views. O-P, SC2012.48.114 in O) lingual, P) labial views. Q-R, SC2012.48.21 in Q) lingual, R) labial views. S-T, SC2012.48.96 in S) lingual, T) labial views. U-V, SC2012.48.27 in U) lingual, V) labial views. W-X, SC2012.48.28 in W) lingual, X) labial views. Scale bars = 1 mm. Photographs by K.E. Runyon.

duced to absent (compare figure 12G-H with 12M-N, figure 12I-J with 12K-L). Another possible variation is that anterior and lateral teeth 10 mm or less in crown height often bear plications at the labial crown foot. The smallest teeth in our sample, 5 mm or less in tooth height, are similar to those identified as *Microdon-taspis tenuis* by Case *et al.* (2001). We believe that these smaller teeth represent very young *Scapanorhynchus* sharks, and an ontogenetic progression is apparent in our sample, wherein as tooth size increases, the labial ridges become restricted to the lateral cusplets and only lateral margins of the main cusp, and eventually they are absent altogether on the largest teeth.

The functional significance of the labial ridges, if any, is unknown, and more than half of the anterior and lateral teeth of at least 10 mm in crown height lack the feature. Plications were observed on posterior teeth of all sizes.

Our identification of the teeth in this sample as *S. texanus* is based on our observation of Campanian specimens from North Carolina and New Jersey, as well as samples of *S. raphiodon* from South Dakota and Wyoming. Although many of the teeth in our sample fall within the size range for *S. raphiodon*, the number of lingual longitudinal ridges is greater and anterior teeth generally lack lateral cusplets. In addition, the largest teeth in our sample, all lateral teeth,

measure up to 39 mm in total height and are more robust than equivalent teeth of *S. raphiodon*. The material identified as *S. raphiodon* by Case *et al.* (2001) from the Eutaw Formation of Georgia is conspecific with our Eutaw sample.

Cretoxyrhinidae Glickman, 1958
Cretoxyrhina Glickman, 1958
Cretoxyrhina mantelli (Agassiz, 1843)

Figure 13A-B

Material examined – MMNS 4863, lateral tooth.

Remarks – MMNS 4863 is indistinguishable from *C. mantelli* teeth reported from Coniacian through lower Campanian strata elsewhere (*i.e.*, Applegate, 1970; Shimada, 1997), and this tooth represents the largest of the lamniform sharks known thus far from the Eutaw Formation. Apart from large size, the tooth can be distinguished from those of other non-anacoracid lamniform sharks in being broadly triangular, with smooth enameloid lateral shoulders as opposed to cusplets, and lack of crown ornamentation.

Otodontidae Glickman, 1958
Cretalamna Glickman, 1958
Cretalamna appendiculata (Agassiz, 1843)

Figure 13C-H

Material examined – MMNS 5086, 11 teeth; SC2012.48.90, anterior tooth; SC2012.48.91, lateral tooth; SC2012.48.92, posterior tooth; SC2012.48.93, 12 teeth; SC2012.48.94, 7 incomplete teeth.

Remarks – Anterior (figure 13C), lateral (figure 13E), and posterior (figure 13G) jaw positions are represented in our sample. Anterior teeth are symmetrical with elongated and rounded lobes, but towards the commissure the teeth become wider, the main cusp lower and distally curving, lateral cusplets broader, and root lobes short and rectangular. Crowns lack ornamentation.

Figure 13. Lamniform shark teeth from the Eutaw Formation at Luxapalila Creek, Mississippi. A-B, *Cretoxyrhina mantelli*, MMNS 4863 in A) labial, B) lingual views. C-D, *Cretalamna appendiculata* anterior tooth, SC2012.48.90, in C) labial, D) lingual views. E-F, *C. appendiculata* lateral tooth, SC2012.48.91, in E) labial, F) lingual views. Eoptolamnidae Kriwet et al., 2008
Protolamna Cappetta, 1980
Protolamna borodini (Cappetta & Case, 1975a)

Figure 13I-N

Material examined – MMNS 5282, incomplete tooth; SC2012.48.38, incomplete tooth; SC2012.48.39, main cusp.

Remarks – These small teeth are distinguished by a narrow but labio-lingually thick main cusp, single pair of lateral cusplets that are situated slightly labial to the main cusp, and crown ornamentation consisting of longitudinal ridges. Crown ornamentation is variable, as SC 2012.48.38 (figure 13I-K) has fine ridges on the lower half of the labial face, but the lingual face is virtually smooth. In contrast, SC 2012.48.39 (figure 13L-N) has coarse labial ridges that extend more than halfway up the face, and the lingual face is also plicated. The conspicuous lingual root boss is not bisected by a groove, and the two root lobes are closely spaced.

This species was originally attributed to *Plicatolamna* (Cappetta & Case, 1975a) and later transferred to *Cretodus* (i.e., Case & Schwimmer, 1988; Case et al., 2001). More recently, Case & Cappetta (2004) referred the species to *Protolamna*, and Kriwet et al. (2008) removed the genus from Cretoxyrhinidae and placed it within Eoptolamnidae. Based on comparisons with other species occurring in Texas (i.e., Cappetta & Case, 1999), the laterally compressed nature of the *borodini* morphology indicates that assignment to *Protolamna* is appropriate, and this generic name is applied herein.

Batoidea
 Sclerorhynchiformes Kriwet, 2004
 Ptychotrygonidae Kriwet and others, 2009
Ptychotrygon Jaekel, 1894
Ptychotrygon chatahoochieensis Case et al.,
 2001

Figure 14

Material examined – MMNS 5130, tooth; SC2012.48.51, tooth; SC2012.48.52, tooth; SC2012.48.53, tooth; SC2012.48.54, juvenile tooth; SC2012.48.55, posterior? tooth; SC2012.48.56, 21 teeth.

Remarks – *Ptychotrygon chatahoochieensis* was erected based on a single tooth, but the

overall morphology of the type specimen is consistent with the teeth in our sample, and we consider them to be conspecific. We also believe that the morphology is conspecific with Meyer's (1974) *P. triangularis eutawensis*, but because his work was never published that name is invalid, and we utilize *P. chatahoochieensis*. It should be noted that this morphology is not the same as *Ptychotrygon eutawensis* erected by Case et al. (2001), which is morphologically similar to some teeth we identified as *Texatrygon* (see below).

Teeth of *P. chatahoochieensis* are smaller and have different crown ornamentation than Turonian *P. triangularis* (see Cappetta, 1973). Nearly all of the teeth in our sample are cuspidate and have a transverse crest dividing the crown into a larger labial face and smaller lingual face. The labial face bears at least one other transverse crest, and the region of the labial protuberance generally bears another short transverse ridge or irregular nodes. Ontogenetic heterodonty is not evident, as teeth 1 mm or less in width are comparable in shape and discrete features to the largest teeth in the sample, which measure up to 3 mm in width. Monognathic heterodonty is difficult to interpret, but variations in cusp height could reflect anterior (higher cusp) vs. lateral (lower cusp) positions. SC 2012.48.55 is unique in having a flat crown with reniform occlusal outline, two nearly equally robust transverse ridges, and cingulum around nearly the entire crown margin (figure 14Q-T). This particular tooth could represent a posterior jaw position. We believe that the two teeth tentatively identified as *P. triangularis* by Case et al. (2001) are actually ontogenetic variants of *P. chatahoochieensis*.

Ptychotrygon rugosum (Case et al., 2001)

Figure 15

Material examined – MMNS 3500, tooth; MMNS 3761.1, tooth; MMNS 3761.2, incomplete tooth; MMNS 3781.1, tooth; MMNS 3781.2, tooth; MMNS 4883, two teeth; MMNS 5081.1, tooth; MMNS 5081.2, tooth; MMNS 5610, tooth; SC2012.48.30, two incomplete tooth crowns.

Remarks – This morphology was originally assigned to *Erguitaia* by Case et al. (2001; p. 95, pl. 5, figs. 100-104), but the type specimen

Figure 14. *Ptychotrygon chattahoochiensis* teeth from the Eutaw Formation at Luxapalila Creek, Mississippi. A-D, SC 2012.48.51 in A) occlusal, B) labial, C) lingual, D) basal views. E-F, SC2012.48.52 in E) occlusal, F) labial, G) lingual, H) basal views. I-L, SC2012.48.53 in I) occlusal, J) labial, K) lingual, L) basal views. M-P, SC2012.48.54 in M) occlusal, N) labial, O) lingual, P) basal views. Q-T, SC2012.48.55 in Q) occlusal, R) labial, S) lingual, T) basal views. Labial at top in occlusal and basal views. Scale bars = 1 mm. Photographs by K.E. Runyon.

is very heavily ornamented and has a massive, poorly differentiated labial protuberance, features that are inconsistent with *Erguitaia*. Only the type specimen was available to Case *et al.* (2001), but our larger sample size allows us to provide a more detailed morphological analysis of this species. In general, the thick crown is slightly wider than long, sub-trapezoidal in occlusal outline, and has a flat to weakly convex occlusal surface bearing four to six equally robust transverse ridges. A labial crown protuberance, half as wide as the entire crown, is blunt and greatly overhangs the root.

Tooth crowns measure up to 8 mm in width, 6 mm in length, and 3 mm in height. A thin transverse ridge divides the crown into a very narrow lingual face and much more expansive labial face. The labial face bears four to five

shorter but equally robust transverse ridges, whereas the lingual face bears very fine discontinuous and anastomosing ridges that are perpendicular to crown width. The labial ridges are parallel and may be straight or crescentic (curved towards the labial margin), and may also be interconnected by finer perpendicular ridges. The massive labial protuberance has a squared appearance. There is a shallow medial fossa at the lingual crown foot. The root is unusual in being high, bisected by a deep nutritive groove, and having rather small basal attachment surfaces when compared to other sclerorhynchid teeth in our sample.

Cappetta (2006, 2012), without supporting argument, recently placed the morphology within *Ptychotrygon*. We concur with this assignment and note that, although atypical, the

Figure 15. *Ptychotrygon rugosum* teeth from the Eutaw Formation at Luxapalila Creek, Mississippi. A-D, MMNS 3761.1 in A) occlusal, B) labial, C) profile, D) basal views. E-F, MMNS 5081.1 in E) occlusal, F) labial, G) profile, H) basal views. I-L, MMNS 3781.1 in I) occlusal, J) labial, K) profile, L) basal views. M-O, MMNS 5610 in M) occlusal, N) profile, O) basal views. Labial at top in occlusal and basal views, at left in C & N, at right in G & K. Scale bars = 1 mm. Photographs by K.E. Runyon.

morphology is more consistent with *Ptychotrygon*, particularly to species like *P. triangularis* (see Cappetta, 1973). We amend the spelling of the species name to reflect the gender of the generic name according to Article 34.2 of the International Code of Zoological Nomenclature (ICZN). *Ptychotrygon rugosum* differs from all other species within the genus in its very large size and rather flat but expansive occlusal surface, having five to six labial transverse ridges in combination with longitudinal ridges on vertical surfaces, and massive, squared labial protuberance that greatly overhangs the root. The crown of this species could easily be confused with small *Ptychodus* (particularly *P. decurrens*), and it is remarkably similar to the extant rhinobatoid, *Rhina ancylostoma*. In fact, wear patterns observed on *P. rugosum* are comparable to those on *R. ancylostoma* teeth, and it is possible that *P. rugosum* occupied a similar trophic niche, crushing shelled invertebrates like small clams, snails, and crustaceans.

Texatrygon Cappetta & Case, 1999
Texatrygon benningensis (Case et al., 2001)

Figure 16

Material examined – MMNS 4754, tooth; MMNS 5128.1, six teeth; MMNS 5128.2, symphyseal? tooth; MMNS 5480, tooth; MMNS 5481, 3 teeth; SC2012.48.57, tooth; SC2012.48.58, tooth; SC2012.48.59, tooth; SC2012.48.60, 17 teeth.

Remarks – This morphology was also originally assigned to *Erguitaia* by Case et al. (2001: 94-95, pl.4, figs. 90-94). However, the crown of the *benningensis* morphology is inconsistent with the two currently recognized species, *E. misrensis* (Cappetta, 1991) and *E. arganiae* (see Arambourg, 1952) from the Maastrichtian of Africa, in that the crown is strongly cuspidate as opposed to nearly flat, and the labial protuberance is broadly united to the labial margin as opposed to sharply separated (in occlusal view). The *benningensis* morphology is clearly more similar to various species of *Ptychotrygon* that have been identified from North America (i.e., McNulty & Slaughter, 1972; Cappetta,

Figure 16. *Texatrygon benningensis* teeth from the Eutaw Formation at Luxapalila Creek, Mississippi. A-D & P, SC2012.48.57 in A) occlusal, B) labial, C) lingual, D) profile, P) basal views. E-H & O, SC2012.48.58 in E) occlusal, F) labial, G) lingual, H) profile, O) basal views. I-L, SC2012.48.59 in I) occlusal, J) labial, K) lingual, L) profile views. M-N, MMNS 5128.2 in M) labial, N) lingual views. Labial at top in occlusal and basal views, at right in profile views. Scale bars = 1 mm. Photographs by K.E. Runyon.

1975; Case, 1987a), and Cappetta (2006, 2012) has assigned the species to this genus. However, Cappetta & Case (1999) proposed the generic name *Texatrygon* to identify high-cusped teeth that lack labial transverse ridges and may be smooth or only weakly ornamented labially. The Eutaw specimens bear medial labial ornamentation consisting of a chevron-shaped ridge, sometimes with intermediate branching ridges (see figures 16A, E, I), but their overall morphology and development of enameloid rugosities is consistent with *Texatrygon*, and we therefore utilize this name for the *benningensis* tooth morphology. Crowns of *T. benningensis* are more consistently ornamented than those of three species currently assigned to *Texatrygon*, including *T. hooveri* (see McNulty & Slaughter, 1972), *T. greybullensis* (see Case, 1987a), and *T. copei* (Cappetta & Case, 1999). The species *T. stouti* from the Santonian of New Mexico (Bourdon *et al.*, 2011) appears to be the same as *T. benningensis*, and if so *T. stouti* is a junior subjective synonym of *T. benningensis*.

We interpret variations in crown morphology to represent monognathic and ontogenetic

heterodonty. Teeth that may have been closer to the jaw symphysis are of nearly equal width and height (figure 16M-N), whereas those in more lateral positions are obviously wider than high (figure 16I-K). Overall tooth size ranges from 1.5 to 5 mm in width, and teeth within the lower range are simply smaller versions of teeth within the higher range. Wear patterns on crown cusps (apices are often worn down to reveal internal dentine) indicate that teeth were used for clutching shelled prey.

Sclerorhynchidae Cappetta, 1974

Ischyrrhiza Leidy, 1856

Ischyrrhiza mira Leidy, 1856

Figure 17A-Q

Material examined – MMNS 3787, rostral spine; MMNS 5489.1, incomplete rostral spine; MMNS 5489.2, 2 incomplete rostral spines; MMNS 5125, 6 rostral spines; MMNS 5478 rostral spine; SC2012.48.31, 3 incomplete rostral spines; SC2012.48.32, incomplete rostral spine; SC2012.48.35, tooth; SC2012.48.36,

2 teeth; SC2012.48.45, rostral? denticle; SC2012.48.46, rostral denticle; SC2012.48.47, rostral spine; SC2012.48.48, 3 rostral? denticles; SC2012.48.49, 16 rostral spines.

Remarks – Slaughter & Steiner (1968) considered rostral spine root histology to be taxonomically significant, and suggested that *Ischyrrhiza mira* was derived from *I. schneideri*. Meyer (1974) compared the rostral spine histology of Campanian *I. mira*, Coniacian *I. schneideri*, and Santonian material from the Tombigbee Sand Member that he identified as *I. sp. cf. I. mira*. He stated that the histology and overall spine size of the Santonian sample was intermediate between the Coniacian and Campanian samples, corroborating Slaughter & Steiner's (1968) hypothesis. The validity of identifying *Ischyrrhiza* species based on spine histology has yet to be rigorously tested, and although the spines and teeth in our sample are smaller than the maximum size of equivalent remains of Campanian *I. mira* that we examined (from New Jersey, North Carolina, and South Carolina), the morphologies are comparable. It may simply be that we have only recovered remains of younger individuals thus far. The material that Meyer (1974) identified as *Ptychotrygon palaeformis* is herein considered to represent teeth of *I. mira* (see figure 17A-D for an example).

A number of denticles and very small spines with ornamented crowns have also been collected during our study. The denticles and spines have a crown that is posteriorly inclined, with a flat and smooth anterior surface, and convex posterior surface that bears several robust longitudinal ridges that may reach the crown apex. The identification of these remains has been confusing, and the spines are morphologically consistent with material identified as *I. georgiensis* by Case *et al.* (2001), *Ischyrrhiza* sp. by Meyer (1974), and *Ptychotrygon eutawensis* by Bourdon *et al.* (2011). Meyer (1974) reportedly did not find his *Ischyrrhiza* sp. spines directly associated with larger spines that he tentatively identified as *I. mira*, and it is possible that Case *et al.* (2001) are correct in that the spines represent a distinct and possibly diminutive species of *Ischyrrhiza* (and similarly *I. avoncola*; see Estes, 1964). Assignment of the spines to species within *Ptychotrygonidae* (*i.e.*, Case, 1987a; Bourdon *et al.*, 2011) is controversial because it remains to be conclusively shown (through articulated cranial remains) that any species

within the family possessed rostral spines (see Cappetta, 1987; Underwood, 2006).

As noted above, the general crown morphologies of denticles and tiny spines are identical. Denticles have a short crown, and the base is rather flat, circular in dorsal view, with a flat basal surface and lateral projections emanating from the margin (figure 17P-Q). Spines have a more elongated crown and the peduncle is cylindrical below the crown but basally expanding into two diverging protuberances (figure 17J-L). Denticles of intermediate morphology are shown in figure 17M-O. It must be noted here that the posterior crown base of some larger *I. mira* rostral spines in our sample bear numerous short longitudinal ridges that are oblique to crown length (see figure 17F; also noted by Meyer, 1974), and this feature can also be seen on Campanian *I. mira* spines. We associate the highly ornamented denticles and tiny rostral spines with *I. mira*, following Meyer's (1974) interpretation for *I. schneideri*. Denticles like SC 2012.48.45 (figure 17P-Q) may have been located on dorsal and/or ventral surfaces of rostra, whereas spines like SC 2012.48.47 (figure 17J-L) could represent juvenile individuals or a more proximal portion of an adult rostrum (also Cicimurri, 2007).

Borodinoprists Case, 1987b

Borodinoprists ackermani Case et al., 2001

Figure 17R-Y

Material examined – MMNS 5476, rostral spine; SC2012.48.41, rostral spine; SC2012.48.42, rostral spine; SC2012.48.43, incomplete rostral spine; SC2012.48.44, 5 incomplete rostral spines.

Remarks – These diminutive rostral spines (less than 6 mm in total spine length) are similar to those of *Onchoprists* in that they bear several posterior barbs (see Dunkle, 1948; McNulty & Slaughter, 1962; Williamson *et al.*, 1993). However, the Eutaw spines differ in that an arcuate enameloid 'collar' is associated with each barb. Meyer (1974) was the first to document these unique spines, from both Eutaw Formation and Coffe Sand (Campanian) strata of Mississippi, but he tentatively referred to the material as *Sclerorhynchus* sp. 2 (see p.109-110, fig. 29C). The morphology was later identified as a new genus, *Borodinoprists*.

Figure 17. Sclerorhynchid ray teeth and rostral spines from the Eutaw Formation at Luxapalila Creek, Mississippi. A-Q, *Ischyrrhiza* sp. cf. *I. mira*. A-D, tooth, SC2012.48.35, in A) occlusal, B) labial, C) lingual, D) profile views. E-F, rostral spine, SC2012.48.32, in E) dorsal, F) ventral views. G-I, rostral spine, MMNS 5489.1 in G) dorsal, H) posterior, I) ventral views. J-L, rostral spine, SC2012.48.47, in J) profile, K) anterior, L) posterior views. M-O, rostral denticle, SC2012.48.46, in M) profile, N) anterior, O) posterior views. P-Q, rostral denticle, SC2012.48.45, in P) anterior, Q) posterior views. R-Y, *Borodinopristis ackermani* rostral spines. R-T, SC2012.48.41 in R) dorsal, S) ventral, T) posterior views. U-W, SC2012.48.42, in U) ventral, V) dorsal, W) posterior views. X-Y, SC2012.48.43, in X) dorsal, Y) posterior views. Scale bars = 1 mm. Photographs by K.E. Runyon.

tis, by Case (1987b), and three species, *B. ackermani* (Eutaw Formation; Case et al., 2001), *B. schwimmeri* (Campanian of the Gulf and Atlantic coastal plains; Case, 1987b; Cicimurri, 2007), and *B. shannoni* (Campanian of the Atlantic Coastal Plain; Case and others, 2012), have been described.

Borodinopristis ackermani and *B. schwimmeri* were originally distinguished based on tooth crown morphology (Case et al., 2001), but no comments were made on the taxonomic utility of the rostral spines. Teeth of *B. shannoni* have yet to be described and illustrated (Case and others, 2012). We have not recovered any teeth, but close inspection of our rostral spines shows that they are identical to those of *B. ackermani* illustrated by Case et al. (2001; pl. 2,

figs. 28-31). Ultimately, *Borodinopristis* rostral spines are useful for species determination. In posterior view, the dorsal and ventral collars of *B. ackermani* are asymmetrical, with the dorsal part of the collar being more basal (closer to the peduncle) than the ventral part, and forming a zig-zag pattern with the posterior carina (see figures 17T, W, Y). In contrast, collars of *B. schwimmeri* are much more symmetrical in posterior view and meet as a straight posterior carina. Rostral spines of *B. shannoni* may have an intermediate morphology, with the posterior barbs and carinae being less asymmetrical than on *B. ackermani*, but not as symmetrical as on *B. schwimmeri*. Additionally, the collars of *B. shannoni* may be incompletely or irregularly formed (Case and others, 2012).

Rajiformes Berg, 1940
 Rhinobatidae Müller & Henle, 1838

Not illustrated

Material examined – SC2012.48.40, tooth crown.

Remarks – SC2012.48.40 is a very poorly preserved tooth that is missing the root, and a large portion of the crown is damaged. The specimen is morphologically consistent with guitarfish teeth, particularly *Rhinobatos*, but more precise identification cannot be made based on the available sample.

SC2012.48.101, ovate tooth; SC2012.48.102, 10 ovate and sub-hexagonal teeth; SC2012.48.103, 4 six-sided teeth; SC2012.48.104, six-sided tooth; SC2012.48.105, reniform tooth 1; SC2012.48.106, reniform tooth 2; SC2012.48.107, reniform tooth 3; SC2012.48.108, reniform tooth 4; SC2012.48.109, reniform tooth 5; SC2012.48.110, small six-sided tooth; SC2012.48.111, medium six-sided tooth; SC2012.48.112, large six-sided tooth; SC2012.48.113, 22 reniform teeth.

Remarks – The morphologies that we attribute to this taxon are varied, but we consider them to be conspecific for reasons that are outlined below. Meyer (1974) utilized teeth from the Eutaw Formation of Mississippi as representative specimens of his *Parahypolophus mcnultyi* (sic), a generic name change for teeth previously assigned to *Hypolophus mcnultyi* by Thurmond (1971). Shortly thereafter, Cappetta & Case (1975b) erected *Pseudohypolophus* for the *mcnultyi* morphology. *Pseudohypolophus ellipsis* was named by Case *et al.* (2001) based on a single specimen from the Eutaw Formation of Alabama, and the only two characteristics that they used to distinguish their holotype from *P. mcnultyi* was in being “considerably larger” and more elliptical as opposed to rhomboidal. How-

ever, in addition to not having a statistically significant sample to properly diagnose a new species, Case *et al.* (2001) apparently overstated the size of their type specimen (see Bourdon *et al.*, 2011:43). Teeth of *P. mcnultyi* are variable and may have ovate, sub-hexagonal (wider than long, six-sided but with rounded corners) or rhomboidal crowns. Therefore, the claim that *P. ellipsis* has a more elliptical as opposed to rhomboidal crown is also erroneous. Everhart *et al.* (2003) assigned teeth classically identified as *Pseudohypolophus mcnultyi* to *Brachyrhizodus* (*B. mcnultyi*), but this classification scheme was not discussed in detail until several years later. Manning (2006) argued that the *mcnultyi* morphology should be assigned to *Brachyrhizodus* because *mcnultyi* and *B. whichitaensis* have orthodont histology, and *mcnultyi* occasionally has a polyaulocorhizous root (Johnson & Lucas, 2002), a condition seen more consistently in *Brachyrhizodus whichitaensis*. This argument has apparently not been widely accepted.

All of the specimens in our sample have crowns covered with a layer of enameloid, and on every specimen where it is preserved, the root is holaulocorhizous. The larger teeth in our sample, which measure up to nearly 1 cm in

width, have a thick crown that is conspicuously six-sided, and unworn teeth exhibit a convex occlusal surface (figure 18A-B). Labial and lingual faces are roughly vertical and generally smooth, but some specimens exhibit coarse wrinkling. The sharp edges and corners, and flat labial and lingual faces, indicate that the teeth were tightly packed within the dentition. Except for the fact that roots are holaulocorhizous, these teeth are virtually identical to Campanian *Brachyrhizodus whichitaensis* (see also Cappetta & Case, 1975a; Lauginiger & Hartstein, 1983; Robb, 1989). As examples, compare the tooth of *B. whichitaensis* from the Campanian of South Carolina (figure 18C-D) to *B. ellipsis* shown in figure 19O-Q, as well as the tooth of *B. whichitaensis* from the Campanian of New Jersey (figure 18H-J) to *B. ellipsis* in figure 18E-G.

Many teeth in our sample are similar to the type of *P. ellipsis* and to *P. mycnultyi* (see figure 18N-V; also Thurmond, 1971; Cappetta & Case, 1975b; Cicimurri, 2000), and still others have a rhomboidal outline similar to *Rhombodus levis* (i.e., figure 18K-M; see also Cappetta & Case, 1975a; Robb, 1989). These teeth have rounded corners and edges, and only portions of vertical surfaces are flat, indicating less contact between teeth and therefore a less rigid dentition. The most unusual teeth in our sample are the smallest specimens, which measure less than 2 mm in width (figure 19A-K). These teeth have a reniform occlusal outline and distinctive crescent-shaped transverse crest and nodes on the occlusal surface, features that are reminiscent of the single known specimen of *Enantiobatis tarrantensis* from the Cenomanian of Texas (Cappetta & Case, 1999).

We interpret these varied morphologies as representing ontogenetic and monognathic (and possibly dignathic) heterodonty within a single species, rather than two, three, or four distinct species. The six-sided *B. whichitaensis*-type teeth may have occurred close to or even on the jaw symphysis, whereas the ovate to rhomboidal *Pseudohypolophus*- and *Rhombodus*-type morphologies may have occupied more lateral and posterior positions. If this association is correct, the holotype of *P. ellipsis* described Case *et al.* (2001) could represent a lateral jaw position. The tiny *Enantiobatis*-like morphology is considered to be a juvenile growth stage, and we envision an ontogenetic series where the crown size, thickness, and convexity of the occlusal

surface increased, the labial margin became straighter, crown margins became sharper and more angular, and the transverse crest was reduced and eventually lost as an individual grew. Figure 19 shows a hypothetical growth series, with A-K representing progressively larger juvenile teeth, L-M a sub-adult stage, and O-Q an adult.

We also propose assigning all of these morphologies to *Brachyrhizodus* rather than *Pseudohypolophus* because our presumed adult teeth (from more medial jaw positions) very closely resemble Campanian *B. whichitaensis*. The fact that the roots of our Late Santonian teeth are holaulocorhizous rather than polyaulocorhizous is attributed to the evolutionary stage of the genus, where a single blood vessel was sufficient to nourish the tooth. The larger teeth of *B. whichitaensis* may have required more blood while developing, and it should be noted that lateral teeth of this species can be holaulocorhizous. Although the term '*ellipsis*' does not accurately reflect the range of morphology within the species, it is retained herein.

Discussion

Santonian elasmobranch records from North America are sparse, but unsurprisingly the assemblage we collected compares quite well to Eutaw Formation assemblages documented by Meyer (1974) and Case *et al.* (2001). Many of the species we identified also inhabited the southern portion of the Western Interior Seaway, particularly in the area of present-day New Mexico (Point Lookout Sandstone; see Williamson *et al.*, 1989; Bourdon *et al.*, 2011), and to a lesser extent in Kansas (Niobrara Formation; see Shimada & Felitz, 2006). It is also interesting to note that the Eutaw Formation assemblage bears similarities to Campanian elasmobranch assemblages documented from the Gulf Coastal Plain (i.e., Meyer, 1974; Case & Schwimmer, 1988; Manning & Dockery, 1992).

Deposits of the Eutaw Formation preserve a deepening-upward (transgressive) sequence, with rippled sandstones and interbeds of parallel laminated sandstone and claystone (bimodal) within the Eutaw Member, indicating tidally influenced nearshore deposits, possibly a delta, prograding beach, or river mouth (see Whetstone & Collins, 1982). Massive, bioturbated and glauconitic beds with crustacean bur-

rows suggest offshore marine shelf, and thin to massive, moderately bioturbated, calcareous beds at the top of the Tombigbee Sand represent lower energy and more offshore marine environments. The overlying Mooreville Chalk consists of shelf mudstones (Soens, 1984; Russell, 1986; Mancini & Soens, 1994). Stratigraphically, the fossil-bearing unit we sampled has been mapped as part of the Eutaw Member, and it occurs within the section representing tidally influenced nearshore marine deposits. Paleontologically, the deposit contains a mixture of terrestrial, brackish, and normal marine taxa.

Additional vertebrate fossils associated with the elasmobranch material include osteichthyan remains, which consist primarily of teeth but also skull bones, vertebrae, and scales. Taxa include *Lepisosteus* sp., *Enchodus* sp. cf. *E. petrosus*, *Xiphactinus* sp. cf. *X. vetus*, indeterminate plethodid jaw fragments, *Megalocoelocanthus* sp., *Anomoeodus* sp. cf. *A. latidens*, cf. *Hadrodus priscus*, and a lungfish (currently under study by G. Phillips). Archosaurs are represented by teeth of two dinosaurs, a theropod and a hadrosaur, and teeth and osteoderms of a crocodilian. Shell fragments of unidentified trionychid and chelonoid turtles are uncommon.

Invertebrate fossils are poorly represented in our sample and consist mostly of fragments of black, phosphatic steinkerns. Some pieces of decapod crustacean carapace and chelipeds appear to represent the pagurid *Pagurus convexus* and the callianassid *Callianassa* sp. One or two species of gastropod (including a possible turritellid) and one pelecypod are also present. Ablated echinoderm plates were recovered, as were several cephalopod tentacle hooklets. Fossil wood is relatively common and consists of both lignitized fragments and silicified pieces. Several amber grains 1 mm or less in size were also recovered.

Conclusions

Twenty one elasmobranch species were recovered from a highly fossiliferous deposit within the Eutaw Member of the Eutaw Formation exposed along Luxapalila Creek in Lowndes County, Mississippi. These include *Meristodonoides multiplicatus* n. sp., *Lonchidion cristatum* n. sp., and *Cantioscyllium grandis* n. sp. Three additional species have been reassigned to genera other than those originally named,

including *Ptychotrygon rugosum* (formerly *Erguitaia*), *Texatrygon benningensis* (formerly *Erguitaia* and *Ptychotrygon*), and *Brachyrhizodus ellipsis* (formerly *Pseudohypolophus*). The elasmobranchs are associated with bony fish, turtle, crocodilian, dinosaur, and crustacean remains, and these fossils, along with wood fragments and amber grains, indicate deposition occurred close to a forested shoreline in less than 30 m water depth.

Acknowledgement

We thank George Phillips for arranging the loan of vertebrate fossils from Luxapalila Creek to DJC and CNC, as well as for his insightful discussion on Cretaceous stratigraphy in Mississippi. This paper benefited from the editorial suggestions of Brian Beatty and two anonymous reviewers.

PROPST PARK IMPROVEMENTS MEETING AGENDA

1. Potential Fossil Park at the Lux/Propst Park
2. Office Renovations Update
3. Bids for Baseball Lighting Retrofit
 - a. Columbus Light & Water
 - b. TVA Sponsorship Update
4. Landscaping
 - a. Propst Park Main Office
5. Tennis/Pickleball Courts
6. Christmas Lighting

BENEFITS OF MUNICIPALITIES DISPLAYING CHRISTMAS LIGHTS

Introduction

The tradition of displaying Christmas lights in municipalities goes beyond mere decoration. It plays a crucial role in enhancing community spirit, boosting local economies, and improving the overall aesthetic appeal of public spaces. This report outlines the various benefits of municipalities investing in Christmas light displays.

Community Engagement and Morale

Fostering a Sense of Community: Christmas lights create a warm and inviting atmosphere that brings people together. They encourage residents to participate in community events and activities, fostering a sense of unity and belonging.

Boosting Morale: The festive ambiance created by Christmas lights can significantly improve the mental well-being of residents. The cheerful displays help reduce stress and promote a sense of joy and togetherness.

Economic Benefits

Tourism and Local Economy: Festive light displays attract tourists, which boosts local businesses such as hotels, restaurants, and shops. For example, the Gulfport Harbor Lights Winter Festival in Mississippi draws thousands of visitors each year, significantly contributing to the local economy.

Increased Spending: The holiday season is a peak time for consumer spending. Attractive Christmas displays can encourage both residents and visitors to spend more, benefiting local retailers and service providers.

Aesthetic and Cultural Value

Enhancing Aesthetic Appeal: Christmas lights transform public spaces into visually stunning environments. This not only makes the area more attractive but also instills a sense of pride among residents.

Cultural Significance: Christmas lights help preserve and celebrate cultural traditions. They provide a sense of continuity and heritage, which is important for community identity.

Social and Environmental Impact

Promoting Acts of Kindness: The festive spirit encouraged by Christmas lights often leads to increased charitable activities and community support. People are more likely to engage in acts of kindness and generosity during the holiday season.

Sustainable Practices: Modern Christmas light displays often use energy-efficient LED lights, which reduce energy consumption and environmental impact. Municipalities can set an example by adopting sustainable practices in their festive decorations.

MISSISSIPPI OFFERS SEVERAL FANTASTIC CHRISTMAS LIGHT DISPLAYS ACROSS VARIOUS municipalities. Here are some notable ones:

1. Gulfport Harbor Lights Winter Festival

Location: Gulfport

Highlights: Over 1.5 million lights spread across 40 acres in Jones Park. Features include carnival rides, a train station, and the “Dancing Trees” show.

2. 50 Nights of Lights

Location: Cleveland

Highlights: More than 1 million lights transform Cleveland into a winter wonderland. The display runs nightly until January 1 and can be enjoyed by walking or driving through.

3. Canton Christmas Festival

Location: Canton

Highlights: Downtown Canton is adorned with twinkling lights, offering hot cocoa and holiday cheer from December 1 through December 23.

4. Christmas in Natchez

Location: Natchez

Highlights: A month-long event featuring the lighting of a 34-foot tree on Main Street, lights in Memorial Park, choral music, and rides for kids.

5. Christmas in the Park

Location: Tylertown

Highlights: Holmes Water Park is transformed with millions of lights. The driving tour is open from Thanksgiving to New Year’s Eve.

6. Christmas on Deer Creek

Location: Leland

Highlights: Santa arrives on a water-propelled sleigh, and the floats remain lit for the holiday season.

7. Lewis Light Show

Location: Purvis

Highlights: A family-run light show featuring extensive light displays. Admission is free, but donations are welcome.

8. Light Garden

Location: Olive Branch

Highlights: Hundreds of giant 3D light displays, live performances, and photo opportunities.

9. Magic of Lights

Location: Brandon

Highlights: A drive-through experience featuring classic holiday displays like Winter Wonderland and the Enchanting Tunnel of Lights.

CONCLUSION

Investing in Christmas light displays offers numerous benefits for municipalities. It enhances community spirit, boosts the local economy, and adds aesthetic and cultural value to public spaces. By prioritizing festive decorations, municipalities can create a vibrant, welcoming, and economically thriving environment that benefits everyone.

COLUMBUS FIRE AND RESCUE

Monthly Report

COLUMBUS FIRE & RESCUE

To the Honorable Mayor and City Council Members:

I submit for your review and acceptance the following summary of activities. The Department answered a total of 245 alarms during the month of September, 2024; compared to 208 alarms a year ago this same month, and 287 alarms last month.

12 Fires 17 Good Intent Calls _____ Overpressure/Explosion
180 Rescue/EMT 2 Weather/Natural Disaster _____ Special Incidents 20 False Alarms
7 Service Calls 7 Hazardous Conditions _____ Unknown Incident Types

Fire & Special Incidents:

Civilian Deaths _____ Civilian Injuries _____ Firefighter Deaths _____ Firefighter Injuries _____

False Alarm Property Use: _____ Auto, 11 Residential, 3 Mercantile/Business, _____ Storage,
_____ Industry/Utility, 2 Educational, _____ Assembly, 3 Healthcare/Detention/Correction,
_____ Outside/Special Property, _____ Manufacturing/Processing, _____ Undetermined, _____ Other

Estimated dollar value of threatened property: \$ 169,000.00

Estimated dollar loss of insured property: \$ 20,000.00

Estimated dollar loss of uninsured property: \$ 16,000.00

Estimated dollar value of property saved: \$ 133,000.00

Division of Training: 188.0 Hours of in-house department training
 160.0 Hours of specialty or certification training

Life Safety & Public Education: 268 Public Ed. – Participants trained
 6 Community Relations / Involvement
 1 Car Seat Installations / Checks

Code Enforcement: 8 Safety / Code Inspections Performed
 1 Plans review / Building Permits
 1 Fire Investigations
 7 Childcare / Healthcare / Nursing Home Inspections
 0 Burn Permits

Respectfully Submitted,

Chief of Columbus Fire & Rescue

CITY OF COLUMBUS
MONTHLY REPORT SUMMARY

Department Name: Community Outreach

Reporting Period: September 2024

Events:

Men of Compassion Group - Community Mentorship Initiative

CHS Football Game Security- Men of Compassion assisting with homecoming

Community Outreach Programming/Planning:

- Street Revival – High Crime Areas- the Church service in the community, ministering to the neighborhood creating a spiritual atmosphere for the attendee to praise and worship Jesus.
- Conduct a meeting with Community Outreach Board- Community Outreach board members are going to meet monthly.
- Obtaining 501c3/Grant Opportunities-Susan Wilder-Currently community outreach has to complete this status in order to raise funds.
- Hit the Schools-Men of Compassion-Mentorship- “ALL HAND ON DECK!” The City of Columbus has the same problem as nearly every community in America. We need more role-models volunteering in our communities.

Scheduled Meetings:

Columbus Middle School/ - At Risk Students 10/16/24 - 10:00am

We are not allowed to enter onto it without permission. If any property maintenance issue is visible from road, we will send notice. A notice will be sent for overgrowth.

Keep Columbus Beautiful
Meeting Conducted via Microsoft Teams
September 10, 2024 at 5:15 p.m.

Attendees: Lakeysucha Bailey, Jammie Garrett, Chanda Williams, Glenda Richardson, Angela Parker, Quan Walker, Sasha James, and Jo Shumake.

Absent: Stephanie Jones, Casey Bush, Nicole Clinkscales, Marion Kilarski, Doug Kilarski, Carol Boggess, Jack King, Lt. Eric Lewis, Veronica Stewart, Nancy Carpenter, Drico Kidd, Rick Mason, Edna Mae Love, Ruby James, Susan Wilder, Patricia Prowell, Jacob Hancock.

Lakeysucha Bailey welcomed attendees and opened the meeting at 5:30 p.m. with prayer.

Agenda: There were no additions to the September 10 agenda as presented.

Minutes: The August 13, 2024 minutes were approved unanimously (Chanda Williams/Glenda Richardson).

Upcoming Events (Lots!)

- Observance of National Clean Up Day (September 21): KCB will use social media to ask the community to pick up trash (ideally 152 pieces per person), take pictures and send to the KCB Facebook page. This would support Keep America Beautiful's #152 Pick Up Challenge. If everyone did this, the U.S. would be trash-free!
- Columbus Christian Academy (September 26): Sasha, Angela, Jamie, and Stephanie will speak to 19 second graders on the importance of keeping our city (and county) clean.
- National Night Out (October 1): Police Chief Daughtry has asked KCB to participate by offering information about who we are, what we do, and how everyone can help make neighborhoods cleaner so they are safer. Event follows the October 1 City Council meeting and will be in the Municipal Annex parking lot. We should be there at 5:30 pm for a probable 6:00 pm start time. Jamie, Sasha, and Angela will take the lead on this event.
- KCB Clean Up (October 19): Our Fall focus is picking up tires; other trash welcome, as well.
 - Logistics: Sasha will contact WastePro (Jamie will draft email text); Glenda will call radio stations and alert them to the event; Orlando will create flyer; Lakeysucha and Angela will see about appearing on WCBI's "Midday" program.
- Red Ribbon Celebration (October 24): The Columbus Housing Authority has asked KCB to participate; we will have a table with information.
- Fall Fun Festival (October 26): At Propst Park from 6:00 pm until 8:00 pm. There was a discussion of what we can provide to the estimated 800 attendees – please send ideas to Lakeysucha and Jamie by September 17 so we can start getting things ready.

Committee Reports:

- Officers
 - Bylaws: Met at MUW on August 21 (Lakeysucha, Chanda, Sasha, Jo) and again on August 26 (Lakeysucha and Jo) to work on adapting the Keep Tennessee Beautiful bylaws to our KCB needs. We have an initial draft and will ask for Jamie to review before we continue to refine them and present them to the KCB for approval.

- Finance Committee Report
 - Finance Account Balance: \$1,865.00
 - Fundraisers
 - Will continue our efforts to sell window cards (\$20 for individuals and \$100 for businesses). Cards will be displayed in one of the Columbus Arts Council's windows. Businesses will get shout-outs on KCB's social media.
- Beautification/Community Clean-Up
 - Yard of the Month: The decisions for September winners in the six Wards are in the hands of the Council members; responses pending.
 - Discussed creating an award for businesses which have well-kept commercial spaces. Decided to create awards for 1) the Main Street/Highway 182 corridor and 2) the Market Street/Highway 45 corridor. Jamie will take suggestions from KCB members; initial awards in October.
- Education/Programming
 - See above "Upcoming Events" for September-October educational activities and opportunities.
 - We need to focus on how KCB can coordinate with KMB and America 250 to celebrate the semiquincentennial of the United States. Nancy Carpenter is the state chair for this celebration.
 - Discussion of how to engage WastePro's help in our efforts to teach children about recycling.
- Code Enforcement
 - August 2024 Report (Sasha)
 - Ten rubbish/trash sites
 - Tagged 20 abandoned/trashed cars
 - Jamie photographed 23 trash sites; plans to spend an hour/day to document problem areas.
 - Discussion of Columbus Motor Company's car "lot"; will investigate how to better fence off the mass of probably-unsellable cars that are an eyesore.
- Membership/Media
 - New Member Report: Crystal Cunningham from Columbus Christian Academy joined the team.
 - Angela Parker has joined the Membership/Media committee

Adjournment:

- Angela Parker closed with prayer and the meeting was adjourned at 6:30 p.m. (Jamie Garrett/Chanda Williams; vote was unanimous)

The next meeting is scheduled for October 8 at 5:15 pm.

Respectfully submitted – Jo Shumake, Secretary

City of Columbus Monthly Department Report Summary

Department Name: Office of Planning & Community Development

Department Head: George H. Irby

Reporting Period: September 2024

October 10, 2024

During the month of September the Office of Planning and Community Development had the following activity:

1. 2024 BVP - Received notice for BJA that funds had been posted into our account
2. 2023/24 CPF - Attended meetings, Received and reviewed additional properties from Code Enforcement for possible additions to project, Attempted to contact property owners about program, Printed property information and pictures; Updated property worksheet, Three owners signed Agreements of Intent, Requested three and received two title opinions; Requested one appraisal, Met with Inspection Department about zoning maps, Started preparing enlarged map of city, Contacted Greg Andrews and Pat Adair of the Lowndes County Tax Collector's Office about Tax Forfeited Properties, Received list of tax forfeited properties and printed information, Called Secretary of State Office about the process of purchasing forfeited properties, Prepared and mailed four requests for quotes to prepare survey, Registered and attended on-line webinar, Requested and received access to HEROS, Requested and received Environmental Information for Waggoner Engineering, and Requested and received copies of Waggoner invoices
3. MOHS - Attended Law Enforcement Implementation Workshop
4. Enhanced Modernization for Police Operations - Prepared and submitted application in the amount of \$1,873,500 for equipment for Police Department
5. Safe Streets 4 All - Met with Lance Decuir of Neel-Schaffer
6. Mississippi Outdoor Stewardship Trust Grant (MOSTG) - Prepared and submitted application for \$1,696,000 for walking trail with lighting and security cameras and boat ramp for Luxapalila Creek
7. Energy Efficiency and Conservation Block Grant (EECBG) - started work on application for replace windows at Columbus/ Lowndes County Airport
8. Met with Fire Chief Duane Hughes and Battalion Chief Chip Cain to discuss grants for generators and tornado shelters.
9. Met with Sgt. Johnny Vaughn about CPD grants and projects
10. Met with Park Improvement Committee; and Met with George Phillips, Council Member Mickens, Council Member Beard, Council Member Beard, Chief Operations Officer and Greg Lewis for fossil dig at Luxapalila Park
11. Notarized documents for .Kamal Karriem, George Irby, Tarvoris Vaughn, Joel Parker, Tommie Fenton, Kenneth Wiegel and Corey Beckwith
12. Attended Department Head, Budget and City Council Meetings
13. Attended Main Street Meeting
14. Attended Columbus Redevelopment Board Meeting

We continued to work on existing projects and looked for new ones.

Sincerely,

George H. Irby

George H. Irby, Interim Director
Office of Planning & Community Development

Application for Board, Committee, or other Appointments

First Name Dennis

Last Name Erby

Street Address P. O. Box 2811

Phone Number 6623863737

Email Address erbydennis675@gmail.com

Are you a registered voter and a resident of the City of Columbus, MS?

Select One Yes

Board position you are applying for (Select One) Redevelopment Authority Board

If Board you are applying for has employees, please read and sign the following: No

If yes to above question, what relation? *Field not completed.*

If the answer to the foregoing question was "Yes", please understand that if you are selected for the board appointment, if the family member does not resign before you take office, you may violate the Ethics in Government laws (Mississippi Code Section 25-4-101 et seq.), Section 109 of the Mississippi Constitution or Mississippi's anti-

Yes, I have read and understand the above and foregoing paragraph:

Nepotism Laws
(Mississippi Code Section
25-1-53). If there is a
violation of one or more
of these laws, by
accepting appointment,
you could be personally
liable to repay
compensation paid to a
family member from the
time of your taking office
going forward and may
be fined or penalized. If
the answer is yes, you are
advised to seek legal
advice on the
consequences of
acceptance of the Board
appointment.

Please tell us why you
would like to serve on
this board.

It is my belief that continuity that presently exist between the
members that are now serving and the progress we've made
over the last five years of my tenure warrants an opportunity for
further service

Educational Background

BS Mississippi State University

Professional Experience

I have spent the majority of my life working in the public
domain, I was honorably discharged from the MS National
Guard, Retired as a MS State Trooper Second in command of
the Starkville District, and retired from The Department of
Justice as the U S Marshal for the Northern District of MS.
Therefore, I feel my credentials are more that adequate for me
to be granted another term as a member of the Columbus
Redevelopment Authority.

Other Experience

I have served on several boards in this community that have in
many instances resulted in being elevated to leadership
positions. If granted this opportunity i will continue to serve with
dignity and integrity.
